Syria Sees Israeli Stance As 'Totally Unacceptable'

By Thomas L. Friedman New York Times Service DAMASCUS - The types of seturity arrangements and normalization of relations that Israel is seeking from Lebanon in current negotiations would be totally macceptable to the Syrians, according to Syrian officials.

Any Israeli-Lebanese agreement that included an Israeli military presence inside Lebanon and any formal trade, touristic or diplomatic ties between Beirut and Jerusalem would be met with a Syrian rejection and refusal to with-

draw its 30,000 troops from north-ern Lebanon and the Bekaa Valley. these officials indicated.

"What the Israelis and Lebanese are discussing right now in Wash-ington is a long way from the Syr-ian bottom line for withdrawing from Lebanon," said a Western diplomat familiar with Syrian thinking. "The shape of the agreement the Israelis appear to be seeking is totally unacceptable to

Limited Atomic War Impossible, Russian Says Soviet Urged

Marshal Warns U.S. of Retaliation if Missiles Attack From Europe

By Leslie H. Gelb

New York Times Service MOSCOW - Marshal Nikolai Ogarkov, chief of the armed forces general staff, renewed warnings Wednesday that an attack on the Soviet Union by the intermediate-range missiles that the United States plans to deploy in Europe would result in a Soviet retaliatory strike that would go beyond Eu-rope to the United States itself.

The warning was made in what Soviet officials said was an unprecedented interview with the marshal, who is also first deputy minister of defense. For the most part, the marshal

struck a moderate posture, in par-ticular by modifying his previous position and stating that once a nn-clear war had begun it could not be limited and controlled. The idea of trucker war has never been tested. But by logic, to keep such a war limited will not be

Backing a Freeze

The Associated Press WASHINGTON - The speaker

of the U.S. House of Representatives predicted Wednesday that the House would pass a resolution favoring a nuclear weapons freeze by a margin of at least 50 votes.

Representative Thomas P. O'Neill Jr., the speaker of the House, said the outcome would re- fer a compromise first. flect the will of the American people. No vote was expected before Thursday.

The resolution, which would have no enforcement power behind it, calls on the United States and the Soviet Union to agree to a' "mutual and verifiable" freeze on nuclear weapons deployment and production. The Reagan administration has lobbied against the measure, saying it would undercut U.S. arms control efforts and freeze the U.S. nuclear force at a

To Increase Flexibility

U.S., Dutch Officials Discuss Missile Talks

By Bernard Gwertzman

New York Times Service WASHINGTON - Senior Dutch and U.S. officials have called on the Soviet Union to show more flexibility in negotiations on reducing the number of medium-

range nuclear missiles in Europe. But Prime Minister Rund Lubbers of the Netherlands also indicated that he went along with the view of many West European leaders who have suggested that the United States take the initiative and offer a new compromise to the Soviet Union now.

Mr. Lubbers spoke Tnesday at a news conference after a White House meeting with President

Ronald Reagan. The process of achieving a zero option is so complicated it might be worthwhile to take a phased step." Mr. Lubbers said, adding, "It might be easier to achieve a cer-

tain level and then to negotiate fut-He was referring the zero-option proposal that Mr. Reagan has sup-ported at the Geneva talks. The plan calls for the Soviet Union to dismantle its 600 medium-range missiles — in particular the 340 SS-20s - and for the United States, in

return, to drop plans to deplny 572 new missiles in Europe beginning later this year. Administration officials said it was possible that because of pressure from the Europeans, including government officials in West Germany, Italy and Britain, and from some members of Congress, a new U.S. proposal might be offered without waiting for Moscow to of-

Most officials interviewed, however, said they doubted that the United States would move first. They said the administration was more likely to wait for some sign of good faith from the Soviet Union.

The officials said that no option paper had been worked out within the U.S. government but that the European bureau of the State Department was inclined to recommend a new compromise.

The Soviet Union, asserting that the French and British already have missiles targeted on it, has offered in reduce the number of missiles aimed at Western Europe in 162 - the total of French and British missiles - if the United States does not deploy the new Pershing-2 and cruise missiles. That plan has

been rejected by the West. The West Germans, Italians and British have suggested that the United States test the Soviet readiness to negotiate by proposing an "interim solution" that would allow the Soviet and U.S. sides to each have fewer missiles than currently planned. The Soviet Union has said it would reject such a plan,

Mr. Lubbers said Mr. Reagan had stood firm on the zero-option idea during their talks.

The prime minister said preparations for deployment of the U.S. missiles are under way as schedphisticated weapons by America's adversaries to the uled "as a political and military answer to the Soviet threat." The Netherlands is to deploy 48 cruise

NEW YORK - The treatment of foreign students by American colleges and universities is in a state of chaos created by ignorance, prejudice and an absence of planning, a new study reports.

The 50-page report, entitled "Absence of Decision," was prepared by Cranford D. Goodwin, dean of the

graduate school and professor of economics at Duke University, and Michael Nacht, associate director of the Center for Science and International Affairs at Harvard University.

The authors warn that the threatened imposition of dramatically higher tuition for foreign students in some states could seriously reduce their numbers to the detriment of the academic institutions, local economies and the national interest.

Although the number of foreign students has grown to more than 300,000, there is no consistent policy governing them, the researchers found in a study that concentrated on institutions in Florida, Ohio and Cal-

can students are willing to make the intellectual effort versities here," the authors say. "Moreover, as turmoil and financial sacrifice required in advanced study in and authoritarian rule grow in nations from which

Government critics blame milismall skirmishes with government for such U.S. multinationals as

draw 70 percent or more of their students from abroad "Several engineering deans suggested that without foreign students they would have had to close down

their graduate program in the short run and their whole operation ultimately," the report says. Because graduate students provide essential labor for university laboratories, much research vital to the national interest would "grind to a halt" without for-eign students, the report warns.

For that and many other reasons, the authors insist that foreign stodents are beneficial to the campuses. But if the students are to receive full benefits from their academic experience, the report says, they require aid and attention - effective placement, guidance, language instruction and other services. Often such attention was found lacking.

The study emphasizes that the education of foreign students, like grain and arms, is one of the nation's few remaining stable "export industries," and one with few strong competitors.

ornia.

"It is striking that nations notoriously critical of the United States send their students to colleges and uniand instruction states of freedom and in the United States just as it does in Britain, the

restige of the American degree attracts many foreign The authors found, however, that many university

administrators think of foreign students mainly as bodies in fill their classes and dormitories, without making adequate preparations for them. At the same time, state legislatures, sometimes in

revulsion against a foreign government's conduct tran's, for example - or in response to a local fiscal crisis, threaten to impose special fees on foreign students or to charge them with the full cost of their

Because American students' education is heavily subsidized - through income from endowment and gifts on private campuses and through tax support at public ones - such a move would severely reduce the number of foreign students who can afford to study in the United States, Mr. Goodwin said in an interview last week

He pointed out that Britain instituted such a policy two years ago with such dire consequences in reduced enrollments and international ill will that Prime Minister Margaret Thatcher recently rescinded it.

"Xenophobia always lurks just beneath the surface"

openness of the U.S. system seems to increase." The authors say, adding that they found "ignorance and myth abounding. Many university administrators, Mr. Goodwin said.

seem to feel that having many foreign students is "a sign of failure," and so they pretend such students do At the federal level, Mr. Goodwin said, nn one comes to grips with the political and economie impli-cations. There appears to be no coordinated policy,

and "we had a sense of anarchy." he said. Mr. Nacht expressed concern that political pressure was building over the issues of national security and economie protectionism. He saw a growing danger in federal policies that attribute the development of so-

fact that foreign students are benefiting from U.S. higher education. He also said that American self-confidence was continuing to decline in the area of trade competition. "Instead of being prined of our accomplishments, we become defensive and ask why we should let those people come in and learn our techanlogy," he said.

But the main hurden of bringing order out of chaos, ble new preposals, "it would be Mr. Goodwin concluded, is for "each institution to belpful if the Soviets would come examine itself." With some notable exceptions, colleges have not thought much about the needs of for- proposal that would be true, subeign students and their impact on the country, he said. stantial and verifiable.

U.S. Directive Aims to Influence **Soviet Internal Policy by Pressure**

By Robert C. Toth Los Angeles Times Service

WASHINGTON - In a policy decision considered the first of its kind since the height of the Cold War. President Ronald Reagan has ordered his administration to attempt to influence internal policies of the Soviet Union through trade and other economic pressures as a means of forcing shifts in Moscow's foreign policy.

The decision, contained in a classified document titled National Security Decision Directive 75, is believed to constitute the first time since the Truman administration that a U.S. government has made it a policy goal to seek changes in So-viet domestic affairs. The document was issued to government officials earlier this year.

Administration officials familiar with the document say it seeks to make the Soviet leadership more responsive to internal demands from consumers and nonmilitary sectors of the economy. By applying economic pressure to the Soviet Union, the Reagan administration would attempt to reduce the re-sources available to the Kremlin, and thus force it to make tougher choices between military and civilian spending

Underlying the policy is the con-tention that the roots of Soviet ex-ternal aggressiveness are at least partly internal, and that efforts to constrain Soviet behavior ahroad the Communist regime internally.

Simply put, this means that if the Russians were forced by economic exigencies to reduce their production of tanks and aircraft, for example, they would be less likely to embark on military adventures such as the intervention in Thomas Mann, Marc Chagall, Max Afghanistan.

[Last spring, the Reagan administration was reported to be formulating new ways of dealing with the Soviet Union on economic issues in an attempt to convince Moscow to make more spending decisions in favor of commilitary objectives. This was a key reason for the administration's stand refusing to permit U.S. technology to be used m building the Soviet natural gas pipeline to Western Europe. One rationale was that the revenue from such gas sales would bolster the Soviet economy, and thus its war-

Both William P. Clark, the White House oational security adviser, and his deputy. Thomas C. Reed, spoke of the policy, with Mr. Reed declaring in a speech June 16 that the United States "should not provide the trade and credits necessary to prop up the Soviet economy

making capacity.

mote stability."]

The principal author of the administration directive was Richard sian history at Harvard University. well. Mr. Pipes has long advocated a viet Union.

Policy directives such as this one require approval hy the entire National Security Council as well as the president Not all administration officials appear to be in accord with all aspects of the directive, however. Secretary of State George P. Shultz, for example, has argued that using economic and trade policies in carrot-and-stick fashion tends to disrupt Washington's relations with its allies.

In addition to prescribing ecohas identified propaganda — the policy toward allies who trade with promoting of U.S. policies and the the Soviet Union as well as toward principles of democratic governance governance the Soviet Union itself. principles of democratic govern-ment through the U.S. Information Agency and other outlets - as another way to combat Soviet expan-

One outgrowth of the new directive has been the administration's four-part "Public Diplomacy" effort announced last month. It includes the so-called Project Democracy, in which \$85 million would be spent over two years on must include attempts to influence programs to train young leaders and promote the growth of labor unions, political parties, news outlets, businesses and universities in countries that are not now dem-

> Democrats in Congress have been openly skeptical of Project Democracy, seeing it as a conservative ideological crusade.

The Truman administration, in for his connections to the party the "communist containment" policy it adopted in 1950, stated that Soviet designs for world dominanon" had to be opposed not only resisting Soviet moves ahroad but also by fostering fundamental changes in "the inescapably militant nature of the Soviet system. Little was done to implement

those words, however, and successive U.S. governments later moved away from this comhative attitude. The Reagan administration document is part of a flurry of policy directives adopted by the White House in recent months.

Mr. Reagan issued oo formal policy directives of this kind during his first year in office, according to White House aides. But in the past 15 months he has signed more than 80 such directives, the products of and Paris decreased theirs. a re-evaluation of national security

U.S. Reported Ready To Seek Soviet Curbs At Meeting on Trade

By Axel Krause

PARIS — The Reagan administration plans to renew efforts to convince its allies to tighten sales of sophisticated equipment and technology to the Soviet Union, particularly in the oil and gas sectors, during a two-day meeong starting Thursday in Paris, accord-

Soviet Output are not endangered, the official said. **Increasing** More Slowly

MOSCOW — Soviet economic growth rates flagged in February,

raising questions about a strong January showing that had led to speculation that a lasting uprurn might be under way.

Figures published Wednesday by the central statistics board showed that industrial production in the first two months of the year bad increased by 5.6 percent compared with the same period last

This figure was a significant drop from the 6.3-percent growth rate registered to January.

The report did not give a separate growth figure for February. but statistics for individual industries indicated it was well below the January rate.

The high level of growth at the start of the year led to reports in the West that a drive by the new Soviet leadership for greater pro-ductivity and labor discipline was already invigorating the economy.

But Western economic attachés

in Moscow remained skepócal. They said the January results compared with a dismal month in 1982. looked high only because they were

Production in January 1982 was so poor that the results were never tion, the official said. published. Results the following month were also poor, Western analvsts said. As a result, the eco-nomic attaches said they would have expected a growth rate of around 4 percent or 5 percent this year in any case.

They said it would take a few more months to tell if the efficiency campaign launched by Yuri V. Andropov, the Soviet leader, was having any real effect.

One of the key indicators of efficiency, the labor productivity growth figure, fell from 5.5 percent in January to 4.6 percent for the two months taken logether, pointing to a February level of below 4

Moderate improvements in most industrial sectors were registered last mooth. Oil production, for example, rose to 47.6 million metric port items, such as robotics. tons, compared with 46.5 million in February 1982.

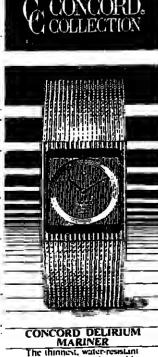

But the coal industry, singled out for special criticism by party leaders, showed only a slight improvemillion to 59.9 million tons.

The growth rate for light indus-try was below target at 2.2 percent, which would seem inconsistent with a pledge by the new Soviet leaders to produce more consumer

goods. Meanwhile, a Soviet deputy trade minister issued a call Wednesday for better planning and coordination in order to preveot a situation in which production quotas are met but consumers' de-

mands remain unsatisfied. The trade minister, Pyotr Kondrashov, complained in an article in Prayda, the Communist Party daily, that industry regularly would agree to meet demands from the re-tail trade, but that individual factories would end up being unable to

fill actual orders. Mr. Kondrashov said the gap between plans and production for light industry this year might approach I billion rubles (about \$1.3 billion). He also criticized the policy of "plan correction," meaning the revision of production targets. almost invariably downward, to reflect supposedly unforesecable fac-

ing to a senior U.S. government official.

Committee for Exports to Commu-nist Areas, known as COCOM, is controversy because "some major European" allies still are either neutral or opposed to implementing new curbs on trading with com-munist nations, particularly if the allies' national security interests

The official, who will participate in the meeting, declined to be iden-tified or to name the allies to which

he was referring.

The COCOM meeting, focusing mainly on oil and natural gas technology, is the first gathering of its kind among the allies on curbing flows of sensitive industrial exports to communist countries since President Ronald Reagan's announcement last November that he was lifong sanctions against U.S. and West European companies providing equipment for the Soviet natu-

ral gas pipeline to Europe.

The immediate goal of the administration is to win agreement from participating nations to restrict sales of technology that would help the Soviet Union develop its oil and natural gas resources, including sophisocated offshore

drilling equipment.

The official said that this was "a critical area" for the Soviet Union. "and we want to restrict sales of items which enhance their economic potential, since it allows them to develop their military capacity. He added, "We would like to see oil and gas development take place

where, like Norway. The administration also is hoping that similar, broader commitments to curb East-West trade will emerge from detailed studies or reviews of trading practices presently underway within COCOM, the Ornaoonal Energy Agency and the North Atlantic Treaty Organiza-

But be conceded that the chances of getting significant agreements in these organizations were slim.

There has been considerable

backpedaling among some allies on restricting trading with communist oations since Mr. Reagan's announcement lifting sanctions, the official said. He added that during a recent visit to European capitals he detected attitudes which be said tanged from being supportive of the U.S. position to being "neutral-ist" or "oon-involved."

at tightening exports of a broad range of sensitive industrial prodstricted, and which be declined to port items, such as robotics.

said the overall review would be said Wednesday that Poland was continued and discussed during a gradually pulling out of its eco-high-level COCOM meeting to be comic crisis, but it said tesults were crats said they planned to restore

At that meeting, U.S. officials also are expected to renew the administration's campaign to enhance COCOM's small investigative capacity and to raise its annual dget, estimated at roughly \$400,000, to about \$2 million.

COCOM, established in Paris in 1949 as part of NATO, was subsequently expanded to include put last month were suppliers of France and Japan. But it still is opcrated with a small staff operating in several rooms in an annex to the

The investigation, which began last summer, was referred to the Justice Department from the Defense Department after the De-fense Contract Audit Agency uncovered the severance payments during an audit, according to gov-erament officials. The audit agency examines the books of Defense Depariment contractors and evaluates the acceptability of costs claimed or proposed by the contractors.

Acting EPA Director Is Queried on Report

WASHINGTON - John

ments, agency officials deleted statements linking dioxin to cancer and birth defects, as well as the agency's conclusion that "Dow's discharge represented the major source, if not the only source, of [dioxin] contamination" in two rivers near a Dow plant in Midland.

The 1981 study was made as Michigan citizen groups were urging the EPA to restrict the levels of dioxin in the area's water, soil and air. The agency has taken no action in Michigan to regulate dioxin, a chemical produced in the manufacture of berbicides. Last month the EPA offered to buy the homes of 2,400 residents in the dioxin-contaminated town of Times Beach,

Missouri. Representative James H. chener, who is chairman of the Science and Technology subcommittee on natural resources, agriculture research and environment, charged Tuesday that Mr. Hernandez "personally intervened at EPA to allow Dow ... to alter a draft report and suppress all references to Dow's responsibility for dangerous levels of dioxin contamination in and around its plant." Mr. Scheuer, a New York Democrat, released copies of the EPA report.

role in the dioxin report. Mr. Hernandez was appointed acting direcfor after Anne McGill Burford resigned as EPA administrator last week following charges that the agency had been overly coopera-tive with some polluters.

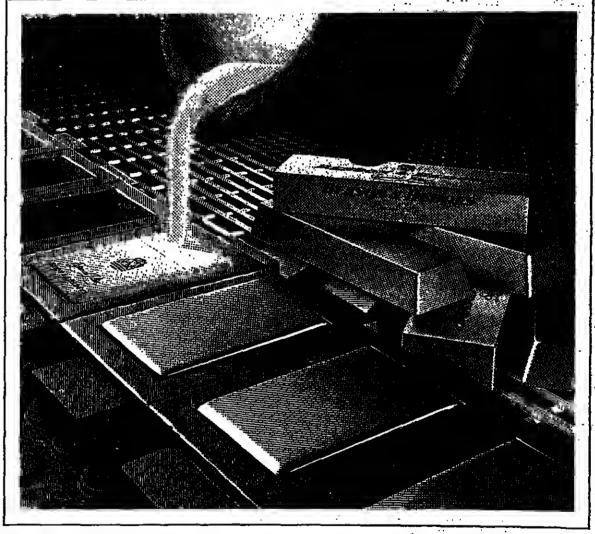

Mr. Hernandez, who was the agency's second-ranking official at the time of the study, strongly denied Tuesday that he had ordered the deletions in the final dioxin report, saying he directed only that it be shared with Dow at the compa-

Mr. Hernandez said he had acted because the report contained some of Dow's own research and "had not been through a thorough peer review by outside scientists."
He conceded that "it might have been better" to circulate the report more widely.

Lisa Swank, a Dow spokesman, said that EPA had "asked us for our comments" as part of a routine peer review process. Other companies also may be contributing dioxin to the Saginaw and Tittahawas-see rivers, the said, and the amount of dioxin in the latter is only 200 parts per trillion. This, however, is four times the standard set by the Food and Drug Administration for dioxin levels in fish.

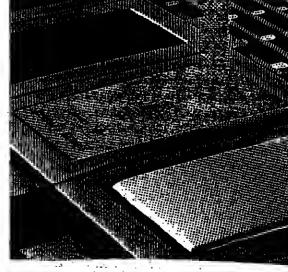

Val Adamkus, the EPA regional administrator in Chicago, who was told by Mr. Hernandez to share the draft report with Dow, said through a spokesman that he con-sidered the order highly improper. The draft report cited studies showing that dioxin causes liver

damage in rats, cancer in animals that have received low dosages, reduced fertility in monkeys, and birth defects in rats, mice and ham-

LONDON — The Irish in Britain, who form the country's largest ethnic community, are finding it difficult to overcome traditional

They believe they are unfairly tade scapegoats for the murderous actions of extremists in Northern Ireland and occasionally in Britain, and they dislike the Irish jokes that depict them as being stupid.

Things are not as bad as in the 1940s, when "No Irish need apply" signs bung outside British factories and apartment buildings after bombing campaigns by an earlier generation of the Irish Republican Army fighting British rule in Northern Ireland.

But it can still be very difficult to be Irish in Britain, according to Irish organizations working with

"Anyone proud to be Irish is often suspect, especially if he expresses his pride. He is thought to somehow secretly favor violence," said Pat Delaney, a founder of the Irish in Britain group. "Ireland is Britain's nearest neighbor.

Feeling against the Irish has increased since the IRA resumed its campaign of violence in Northern Ireland in 1969. Since theo, 366 British soldiers have been killed in the province.

And last year two IRA hombs exploded in London's Hyde Pask and Regent's Park, killing II sol-diers on ceremonial duties and injuring scores of civilians. A Conservative member of Parliament, Ivor Stanbrook, said at the time: "Without a sea of expatriate Irishman in which to swim, the IRA would never escape detection in Britairt."

According to the British-based Irish National Council, the British believe that the half a million krish in Britain are by nature nationalists and therefore republicans, and thus they harbor IRA sentiments and even protect the organization.

"This feeling is not always; expressed, but somehow it's latent." said the council The council hopes to raise the

level of debate and work toward the peaceful unification of Ireland. Jim McGrath of the Federation but the country the British know of Irish Societies said the Irish had the least about. Senate Leaders Try to Untangle Job Legislation

GOODS.

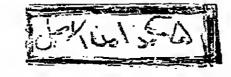

New York Times Service WASHINGTON - The Senate seems closer to passing emergency job legislation following an attempt by Senate leaders to extricate themselves from a parliamentary tangle that has emmeshed the bill for almost a week.

The leaders appear close to a deal that will allow a separate vote sometime next month on a move to sometime next month on a move to repeal tax withholding on interest and dividend income. Supporters of repeal have tried to attach their proposal to the job isil, but President Romaid Rengan has vowed to veto the measure if it contains the withholding repeal

Senator Robert W. Kasten Jr. the Republican from Wisconsin who sponsored the repeal rider, has who sponsored the repeal rider, has offered to withdraw his amendment if he is gnaranteed a vote on it in the near funare. The remaining question was whether House leaders would send to the Senate an appropriate bill to which Mr. Kasten could attach his amendment.

But the legislation hit another snag Tuesday when Larry M. Speakes, the White House spokesman, noted that the cost of the job bill had grown beyond White House specifications.

The Senate bill now totals about \$5.1 billion, about \$200 million above the House version. Mr. Reagan suggested a \$4.3-billion package. All three are sinced at creating table by characteristics. ating jobs by the are simed at cre-into existing government programs and providing food and shelter for needy semilies.

> The pope also criticized the the ology of radical priests who have disobeyed Vatican instructions by essuming political responsibilities.
>
> Latin American bishops meeting recently in Haiti sought to re-estab-lish the pastoral and doctrinal identity of the church, he said.

"Multiple attempts to subordinate the evangelical content of the church to political ends are in contradiction with that identity," he said in reference to the popular church movement in Nicaragua.

Without mentioning Nicaragua by name, he also spoke bitterly of the disruption by supporters of the leftist Sandinist government of the Mass he celebrated in Managua.

Help of 'Tax Havens' Sought in Drug Cases

By Robert L. Jackson Los Angeles Times Service WASHINGTON - The United States may offer millions of dollars in illicit narcotics profits to Carib-bean nations, including the Bahamas, the Cayman Islands and Panana, to encourage their cooperation in drug-related investigations.

Outlining the plan to a Senate subcommittee Tuesday, D. Lowell Jensen, thief of the Justice Department's criminal division, said the proposal would be aimed at discovering bank accounts held by major drug dealers in Caribbean "tax ha-vens" that have strict bank secrecy

In return for information leading to prosecution of these narcotics traffickers for U.S. offenses, the United States would permit forfeiture of their foreign accounts to those governments, Mr. Jensen

He told the Permanent Investigations Subcommittee of the Scuare Governmental Affairs Committee that "we are considering the feasibility of designing all future treaties" with tax-haven countries to include the forfeiture plan.

Mr. Jensen said at the hearing, which is studying the abuse of forcign bank accounts by U.S. taxpayers, that "unreasonable bank secrecy should not be tolerated by the international community."

Roger M. Olsen, Mr. Jensen's deputy, told a reporter: "It's not so important that the U.S. gets the of tax shelter promoters, he said.

money as it is to make sure that

money as it is to make sure that

minutes of tax shelter promoters, he said.

Mr. Wassenaar said his agents have also found foreign banks being

Paul Adderley, attorney general for the Bahamas, who was in the

bearing room, said he could not comment on Mr. Jensen's specific proposal, but he said: "I would be glad to sit down with the Justice est to protect criminals, but we do not want to destroy the banking industry of the Bahamas.

Roscoe L. Egger Jr., the Internal tified that an increasing number of Americans, both crime figures and other citizens, were using Caribbean bank accounts to conceal income and to claim fraudulent business deductions.

Mr. Egger said the refusal of countries with bank secrecy laws to cooperate in U.S. tax-evasion cases had caused the IRS to abandon 57 potential prosecutions in the past five years because foreign bank re-cords could not be obtained.

Richard C. Wassenaar, IRS di-rector of criminal investigations, explained that when drug traffickers or other criminals use U.S. banks they "leave a paper trail in this country, which our investigators can follow."

"But once the money goes offshore that paper trail stops," he said. "It is virtually impossible to trace once it passes behind the veil of bank secrecy.

The only way the IRS can pene-trate illicit "tax shelter" schemes using foreign banks is to plant undercover agents as potential clients want to take the profit out of drug used by 35 members of "tax pro-transactions laundered through foreign banks."

Paul Adderley, attorney general for the Behavior with a second to take the profit out of drug used by 35 members of "tax pro-test" groups, organizations that are withholding taxes from the U.S. government on philosophical

Meteorite Found in Antarctica Was Piece of Moon, NASA Says

New York Times Service

NEW YORK — The National Aeronautics and Space Administration has confirmed that a small meteorite found in Antarctica a

year ago was a piece of the moon. It is the first time that the specific origin of a meteorite has been established.

The discovery in confirming that objects from large bodies in the solar system can reach the Earth, reinforces the growing belief that a few other meteorites now under study by scientists have come from Mars. It proved that not all meteorites are derived from broken-up asteroids or burned-out comets, the presumed source of most rocky material that falls from outer space

The greenish-brown meteorite, weighing one ounce (28 grams), approximately the size and shape of a golf ball, was apparently blasted off the moon by an asteroid impact there 100,000 years ago, the space agency reported. "It's clearly lunar," and Dr. Klaus Keil of the University of New Mexico.

The ratio of the elements from and manganese in one of the rock's mineral components was found to be identical to lunar samples and quite unlike any other meteorites, Mr. Keil reported. Another study revealed that the amounts of 10 ciements in the meteorite were virtually identical to a sample returned by the Apollo 15 astronauts in 1971.

Two meteorites found in Antarctica in 1979 contain geochemical evidence that they originated on Mars, but conclusive proof may not come until samples of Mars can be returned to the Earth

Looser Rules Worry U.S. Air Safety Chief

By Richard Witkin

WASHINGTON - The head of the National Transportation Safety Board says he is deeply concerned that air traffic restrictions imposed when U.S. traffic controllers walked out 19 months ago are being relaxed too fast and that "we could have some accidents."

The official, Jim Burnett, said Tuesday that he did not intend to be alarmist and that there were no indications from incident or accident reports since the strike that

the system had a safety problem.
"But," he added, "we do not have a good reporting system do not fully know what problems may be developing."

Mr. Burnett, chairman of the

agency that investigates airline ac-cidents, gave his views as the safety board discussed a draft report on the results of a recent staff survey of the air traffic system. The air control system is being rebuilt to the capabilities it had before the walkout and the firing of 11,400

Good News From OPEC

on oil prices and production. Whether this kind of bargain can hold together for more than a few months is a question that will hover over the oil markets. It is an intricate formula but more realistic than previous attempts, in the sense that it recognizes explicitly the crucial role of Saudi Arabia. The Saudis bave dominated this whole process of cutting the OPEC price, and from their point of view the result, although it imposes substantial risks oo them, is pretty much a success.

They have managed to bring the price down in a fashion that diffuses the hlame and resentment among the oil producers. They have also managed so far to prevent the spiral of competitive price-culting that promised real peril to all producers everywhere, in OPEC or not. The whole thing has been skillfully done.

At the beginning of this year OPEC was in desperate shape. A fierce price war was under way among its members. Spring was coming. with another sharp seasonal drop in the de-mand for bearing oil. Through much delicate maneuvering the Saudis prodded Britain to lead the price-culting.

The last phase of the internal quarrel was

over market shares. Everybody accepted the

OPEC has arrived, it says, at an agreement idea of a limit to OPEC production. But who was to sell how much? As it has been resolved, the other 12 members have pledged themselves to fixed ceilings at a basic price of \$29 a barrel. The Saudis, it appears, will have no ceiling but will sell as much or as little oil as may be necessary to balance the market. They are gambling that at \$29 the world will want enough OPEC oil to keep them pumping at levels they consider acceptable.

Great tension is built into this agreement. It requires the Iranians to drop exports from the volumes of recent months while the Iraqis, with whom they are at war, are permitted an increase. Will Iran really cut back? Does that sound like the Iranians? The Libyans are also supposed to cut production, but the same questions apply. The Nigerians get an increase, but less than they claimed to need

for their staggering economy.

For OPEC the alternative was collapse, For the countries that import oil this agreement offers an important respite. For them the \$29 price means lower inflation, stronger currencies and more jobs. OPEC's agreement will not last forever, but as long as it lasts it is good news for the rest of the world.

- THE WASHINGTON POST.

Another Media Event

We have seen the brains blown from the skull of a Vietnamese, and a truck overturn near the Washington Monument when its driver got a bullet in his head. We have seen the sad man leap and the drowning man lose hold of the life preserver. And this month television viewers in Jacksonville. Alabama, saw a drunken man set fire to himself. The scenes were alike in their horror, but the last was different in one particular. Those who filed that blaze were not just witnesses to tragedy, they were also its stage managers.

Cecil Andrews, an unemployed roofer, called WHMA-TV four times on Friday. March 4, to say that to protest unemployment in America he was going to set himself on fire in the town square. The station's news director notified the police, who said they would handle it and that the station could send reporters along for a "free ride."

The police searched the square for nearly an hour, found no one and left. About 20 minutes later two television cameramen arrived to find Mr. Andrews staggering from wherever be bad been and fumbling with a matchbook.

The television crew said they tried to "delay" Mr. Andrews by turning the camera lights on and off, waving a hat and telling him the equipment needed time to warm up. Then, in the 37 seconds after the crew started filming, Mr. Andrews doused his jeans with lighter fluid, put a match to his knee and fanned the small flame. When enguised by it, be yelled to the cameramen, "Put it out!" They couldn't. Mr. Andrews, aslame, ran across the square.

He ended up in a Birmingham hospital.

Asked why they didn't try to stop him sooner, the cameramen said they kept expecting the police to show up.

There was, however, a simpler way to pre-

vent Cecil Andrews's act. The extent to which the often-solicited presence of journalists exacerbates any situation is in our business a matter of legitimate and intense concern and debate. But the question of whether that Alabama camera crew was reporting or creating the news is easily answered. Two devices lit that nearly fatal fire: Mr. Andrews's match and the switch that set the cameras whirring. -THE NEW YORK TIMES.

Other Opinion

Privately Mr. Begin Broods'

Menachem Begin kept silent for days as a doctors' strike threatened to disrupt Israel's health services. His comments in the Knesset, once loog and discursive, are now short and perfunctory. He makes public appearances only rarely. His last on-the-record interview was in October. Those instances of uncharacteristic reticence express what is becoming known in Jerusalem as the Begin mystery. While his popularity remains high and his leadership is not seriously challenged, he bas turned inward, and his inner drama could bave important public consequences.

A series of hammer blows, both personal and official, preceded the withdrawal. Last November Mr. Begin's wife, Aliza, died after a long illness.

The period of mourning had hardly ended when the report of the commission on the

Beirut massacre hit the government.

After Mrs. Begin died, President Reagan sent the prime minister a note of condolence which spoke of welcoming him to the White House early this year, by which Mr. Begin understood February; subsequently the White House let it be known that as long as Israeli troops remained in Lebanon, the prime minister would not be welcome.

Privately Mr. Begin broods, and not even his closest confidants are sure about his state of mind. [Some] think be is gathering force for a final effort for a federation linking Israel and Jordan, with the West Bank subsisting in between as a genuinely autonomous polity linked to both neighbors. Others see him shutting himself inside a dream world.

- Syndicated columnist Joseph Kraft.

Interpreting Howe's Budget

[Sir Geoffrey Howe] is a chancellor who rejects the idea that fiscal policy can be used as patent medicine. Now that the recovery has begun, albeit feebly, and confidence is returning, albeit slowly, his concern is to try to creare the conditions for the long-term sustainable growth which has constantly eluded hrasher chancellors in the past.

In what may be an election year and at a time when Britain has the smallest hudget def-

icit in the industrialized world (by a considerable margin), the cynical might have expected a package of tax cuts designed to convince the voters that the hard slog was over. Instead Sir Geoffrey bas done precisely the same as be would have done had he been a year into the government's second term, with a safe distance between himself and the electorate.

Sir Geoffrey Howe's dreary election budget rests on the assumption that more voters will thank the government for conquering inflation than will blame it for allowing unemployment to rise to above 3 million. His calculation is probably correct. Whereas rapid inflation hits everybody and brings governments down, un-employment afflicts only a minority. Those at work are 87 percent of the work force.

Two other political calculations would seem to underlie the budget, and indeed this govern-ment's consistent economic strategy. The first is that the British, with their Puritan streak. are prepared to regard a hair shirt as a surgical appliance which will help the economy to recover. The second is that the poor can be downtrodden with political immunity.

- Peter Jenkins in The Guardian (London).

Staffing the Supreme Court

In considering who should be president from 1985 until 1989, it may be useful to remember that whoever occupies the White House during these last years of the 1980s is likely to nominate a majority of the members of the Supreme Court. Five of the nine judges now on the court are 74 or older. Chief Justice Warren E. Burger and Associate Justice Lewis F. Powell Jr. are 75; William J. Brennan Jr. is 76; Thurgood Marshall and Harry A. Blackmun are 74, and it is fairly sure that two or six years

from now they won't be any younger.

Accordingly, the next president --- Ronald Reagan or whoever - will probably be able to influence, if not determine, the membership and philosophy of the court — if, like FDR, he appoints middle-aged people — for the rest of the century. These could be the most important and enduring decisions he will make in the span of four years.

- James Reston in The New York Times.

FROM OUR MARCH 17 PAGES, 75 AND 50 YEARS AGO

1908: London Fetes Nightingale 1933: German Equality Urged

LONDON - The freedom of the City of London was presented to Miss Florence Nightingale. Owing to ber advanced age, Miss Night-ingale did not attend the Guildhall ceremony, and was represented by her nephew. The Council Chamber was filled. In the galleries sat nurses, representatives of nursing institutions, and schoolchildren, while several famous medical men had seats in the central space on the floor, Sir Joseph Dimsdale, in an cal efforts of his career. The French and Geraddress extolling Miss Nightingale's work. said, "She will live in the hearts of coming generations as an example of true nobility, of utter forgetfulness of self, as one who achieved unsurpassed triumphs in acts of love and charity to her fellow creatures."

GENEVA - Urging revision of the Versailles treaty, so as to give Germany progressive equality with the victor nations in the World War, Prime Minister Ramsay MacDonald confronted the Disarmament Conference with its first draft convention, listing specific reductions with ratios of strength. The time bas come to end discussion of petty details, said the British premier in one of the great oratoriof the risks" they must assume in reducing armaments on the one hand and assuring security on the other. "Either Germany must be given justice and freedom, or Europe will risk destruction," MacDonald declared.

About the United States and El Salvador

For Shunting Aside the Murderers

By Flora Lewis

PARIS - Two years ago, then Sec-retary of State Alexander Haig proclaimed El Salvador a "major test changed in the tortured country, except that the rebels seem to be better have dug in on both sides.

At U.S. insistence, elections were time gratified those who say the guervote only strengthened the hard right and brought peace no nearer.

Now, again with U.S. pressure, the Salvadoran government bas advanced elections for the president and assembly to December this year. mote democracy and a political solu-tion. Secretary of State George It is futile to suppose the Shultz maintains the policy against government-rebel negotiations on grounds that guerrillas "sbould not be allowed to shoot their way into a power-sharing arrangement," but must rely on the hallor box.

The Reagan administration is less than candid. Two years ago senior officials acknowledged privately that reconciliation could not be expected until both sides were forced to the conclusion that they could not possibly win the war. It might take seven or eight years, it was said then, and that estimate remains.

Although he claimed "substantial

progress" for democracy and against communism in recent testimony to the House, Assistant Secretary of State Thomas Enders came closer

than before in admitting this expecta-tion of endless fighting and carnage. He pointed out that the guerrillas main units now have the military capability of a regular army and can continue to wreak havoc on the econonry. "This is what their strategy of guerra prolungada is all about," he said. "We must demonstrate that we. too, can persevere."

There is no reason to think the demand for 1983 elections is based oo a belief that they will settle anything. More likely, the vote is an attempt to persuade the U.S. Congress and the public to support more U.S. aid.

But aid won't bring any more decisive results than elections. It will simply keep the war going. The alternate proposal of negotiations between

government and rebel forces, however, is probably as much of an illusion as the "substantial progress" that Mr. Enders reported. Victnam, Cambodia, any number

of places should bave laught us by now that die-hard opponents, seeking total power by force, do not negotiate and abide by compromise.

Gabriel Zaid, an astute Mexican

observer of the tricky underside of Salvadoran politics, has a better suggestion for making a moderate solution possible. His analysis is also two years old, but time has only confirmed his insights and predictions.

Writing in the Mexican magazine Vuelta, edited by the liberal Octavio Paz. Mr. Zaid documented his thesis that the real struggle in El Salvador is dual, for control of fluid coalitions on both the revolutionary and the government sides. Those on the top cannot agree

about how to treat those on the bottom." he says. "This is the conflict that makes Salvadoran blood run." Less intransigent, less power-hungry people bave wavered from side to

side in the long battle that began with establishment of the People's Revolutionary Army in 1970, a group formed not of Communists but of radicalized Christians from the petite bourgeoisie." The determined fighters are a tiny minority who have not hesitated to murder their own comrades in their effort to stay on top, on both sides.

of East-West relations." The murders sure on the conciliators precisely to have continued. Nothing much bas prevent any political compromise. The true question for now," he says, "is bow to get those who believe in organized, trouble has spread violence out of the picture. Each acts through the region and extremists to provoke the others." Those responsible ... are the

leaders who cannot agree among held last year. The turnout in war- themselves: in particular, those who believe in violence, both in power rillas lack popular support, but the and in the opposition; and of these, above all the ones in power."

But it is impossible to purge the bloodthirsty. The momentum of war, driving but certainly not driven by the many people who yearn mostly for peace, congeals each side and Washington argues that this will pro- forces it to tolerate its own monsters It is futile to suppose that either

military or revolutionary justice can remove these people who are committed to armed struggle. The gesture of an occasional tovestigation is empty. to placate North Americans oot a step in a fruitful direction.

Yet until the murderers are good there is oo chance of moving toward democracy and reconciliation. Mr. Zaid proposes a traditional Latin American way to get rid of them.

"Grant them a kind of amnesty in exile, to get them quickly out of the country, even give them money to make it possible. At that point, equal terms could be offered to those guerrillas willing to accept such terms. A pact could be sought with the political opposition, disconnecting it from the armed opposition."

Then elections could have a meaning, and El Salvador some hope. The New York Times.

Against Fastidiousness By George F. Will TASHINGTON — The photo-revered liberary in the author in

The Washington Post

WASHINGTON — The Reagan Only the demonstration effect gives fimited truth to the domino theory. When Salvadorans saw Nicaraguans ers may seek to promote or manipulate revolutions, but outsiders always depose their dictatorship, they were encouraged to do the same. But arms from the United States are no anti-

peasement and only victory suffices.

The writer is an international affairs fellow of the Council on Foreign Rela-tions. He contributed this comment to

dote for the spread of hope.

The New York Times.

VV administration has resurrected the domino theory. If El Salvador falls, so goes the ominous warning, the reverberations will topple governments from Panama to Mexico. How has this metaphor, so discred-

ited in Vietnam, once again managed to capture the imagination of U.S. policy-makers? One reason is its po-litical usefulness. As many of Mr. Reagan's Central American team first learned in Southeast Asia, the domino theory is indispensable for justifying a major military commit-ment in a small country of little strategic or economic importance.

But the domino theory is more than a convenient slogan. It was born in the 1950s when U.S. foreign policy was preoccupied with the Munich syndrome - the belief that aggression appeared becomes aggression repeated. Derived from the relations among the Powers in Europe, this doctrine was foolishly recast to guide U.S. policy toward a Third World in

the throes of decolonization. The logic of the domino theory. and the Munich doctrine behind it. assumes that wars result from international aggression that can be deterred by firm military response. Revolutions, however, are fundamentally internal affairs that release in one momentous shudder the social. economic and political pressures accumulated over decades of inequality and dictatorship. They do not engulf healthy societies.

By W.M. LeoGrande

Munich and Dominoes Are Irrelevant

have less influence than they expect.

The revolutions in Central Ameri-

ca did not begin because Washingtoo somebow appeased the revolutionaries or their outside allies, and revolutions are not deterred by resolve to stand firm against them. The Munich doctrine and domino theory are irrelevant to these conflicts.

Captives of our own metaphor, we forget that guerrillas were fighting in the Guatemalan highlands when Fi-

del Castro was still in law school. El Salvador's revolution is younger, but it began in earnest in the mid-1970s when Cuba was engaged not in Latin America but in Africa. The insurgent alliance of Social Democrats and Marxists was forged not by Cuba but by the in-transigence and brutality of the Salvadoran military regime.

In Nicaragua, the whole populace rose up against the greedy Somoza dynasty. Cuba's role was negligible. and Nicaragua's ties to Cuba today are as much a product of Washington's hostility as of the Sandinists' alfinity for Fidel Castro.

The error of North America's Eurocentric vision is clear to Mexico. which the White House casts as the ultimate domino. The Mexicans are less afraid of revolution in Central America than they are that U.S. poli-

but in Washington memories of Munich warn that compromise is ap-

of the superpower relationship as

Comment in Brief

Buying Time Has Been Expensive

C'AN SALVADOR — Two or three years ago, when a different cast of characters was running the U.S. Embassy here, a ranking diplomat was leading a visitor down a corridor adorned with photographs of previous ambassadors. "What you're looking at are some of the reasons we're in the mess we're in down here," be scornfully said. "They all came to this place with one goal, one mission: Don't lose El Salvador during your

tour of duty. Whatever you do, just hang on."

Buying time, which has governed U.S. policy in all of Central America, resulted in the late 1970s in a severe institutional crisis. Decades of neglect, in addition to raw anti-communism disguised as foreign policy, neiped to produce a revolutionary upheaval that U.S. policy-makers ap parently became aware of only at the last minute. So crisis management became the principal form of U.S. diplomacy in the region.

Today the combined military response to a complex social-political-military problem is meant to ensure that El Salvador will not be lost during this administration's tour of duty — regardless of the cost.

— Juan M. Vasquez in the Los Angeles Times.

What Good Can Military Aid Do?

BOSTON — Treating El Salvador as the front line against Soviet communism is inappropriate. Every student of the place says that the war has indigenous origins in a long history of economic tyranny and political oppression by a small ruling oligarchy. Of course the rebels are cheered on by Cuba and Nicaragua and have had help from there. But the Reagan administration's claim that a flow of foreign arms to the rebels is the main problem is dismissed by informed people.

In all these years not one soldier, not one official has been convicted of

a single one of the thousands of murders. Last month it was reported from a place called Las Hojas, where Indian peasants run a farm cooperative, that soldiers were said to have shot 18 peasants, including two children. The farmers accused landowners of organizing the killing. The government said it would investigate:

What can U.S. arms and advisers accomplish in a country like that?

The growing feeling in the U.S. Congress is that political negotiations are the only way out of the El Salvador quagmire. - Anthony Lewis in The New York Times

Such 'Dominoes' Fall Unassisted

WASHINGTON — President Reagan is invoking the "domino theory" in his appeal for additional U.S. military aid. Should the
Salvadoran regime fall to the insurgents, he warms, the other countries of
Latin America will topple like a row of dominoes. The image is cockered. It is undeniable that Communist-led rebel movements threaten H Salvador and the rest of Latin America. A revolution could even engile Mexico, creating a hostile government on the U.S. border. But if countries are infected it is not simply because the virus is spreading. Like people, they contract the disease because they are weak and run-down. Many of the Latin regimes being underwritten by U.S. assistance are inept, corrupt oligarchies without the faintest notions of social justice. Communism preys on the hunger of populations for change. Once at power the Communists can be as bad or worse. But the reality of their repressive practices is irrelevant to the peon here and now.

So if the dominoes topple it is not because they are pushed by the long. arm of Moscow or Havana but because they are wobbly for internal reasons and would probably fall even without a made from the outside.

— Syndicated columnist Startley Karnott.

The Planned Elections Won't Help

AMBRIDGE, Massachusetts — The U.S. effort to have Salvadorop elections held at least three months before the originally an nounced date of March 1984 is ill-advised. There would likely be either another victory for Roberto d'Aubuisson's "killer right," or such a mess fraught with tension and accusations of fraud that the democratic process would be the major loser. In either case, the d'Anbusson faction, with its relentless scorn for human rights, would be the major benefit. ary, and that would render negotiations even less likely than now.

An electoral exercise will be possible in El Salvador only after the parties to the conflict have engaged in dialogue. The conditions for that include a cease-fire, international supervision and a guarantee of the safety of all participants.

- Martin Diskin, professor of anthropology at the Massachusetts

Because it has nothing to say cy will produce regional war. about the internal conditions, the Mexico pleads for negotiations The slaughter began. Mr. Zaid doming metaphor is useless for notes, as their way of putting pres- predicting revolution. Outside pow-

The Holy War Mentality Is Dangerous

NEW YORK — Ronald Reagan has now proclaimed and pre-sumably bases his policy upon two

dangerous doctrines: • The Sovier Union is "the focus of evil in the modern world." What is at stake in Central

America is U.S. national security. A communist takeover reaching north to the Rio Grande would certainly threaten the United States. But in thus propounding a Central American domino theory Mr. Reagan is in-

viting a repetition of Vieinam.

Having so defined the situation, when U.S. economic assistance, military training weapons and supolies all failed to create a South Vietnamese Army capable of handling "guerrilla violence" and North VietBy Tom Wicker

ericanize" the war with 500,000 ground troops and fleets of bombers. Had he not preached that U.S. "national security" was at stake?

That is the trap Mr. Reagan is now setting for himself or his successor: If U.S. national security is endangered in El Salvador, but if all the noncombat training and assistance the United States can provide fails to halt "guerrilla violence" - which the record suggests, is altogether likely — can the president stand by and see El Salvador become the first domino in a string reaching to the Rio Grande? Or will he not then be forced by his own words to stronger action?

namese intervention. Lyndon John-son felt he had no choice but to "Am-er danger ties in Mr. Reagan's vision

good versus evil, and his near-proclamation of holy war. Most of what I know about the Soviet regime I find repellent. But it the president of the United States proclaims to the world the view that America's relationship with the Soviet Union is a death struggle with evil, then his own words inevitably suggest that there can be

not on arms control or anything else. Knowing that, why should those proclaimed as "the focus of evil" believe in the possibility of real com-promise with a United States dedicated to their destruction? The boly war mentality on either side tends to evoke it on the other, and holy wars are the least likely to be settled short of one side's annihilation.

no real compromise with that evil -

The New York Times.

LETTERS TO THE EDITOR

A Parade of Thugs

Cuba, Nicaragua and El Salvador receive communist arms and the Reagan administration is outraged. Why? The United States has unequivocally supported a parade of murderous thugs in the region — Batista. Somoza now d'Aubuisson and his gang in El Salvador.

George Shultz says the terrorists must not be allowed to "shoot their way into government." But for generations peasants and Indians have been shot out of government by U.S.backed gangsters. These people, who continue to be slaughtered like diseased cattle, would go to the devil himself for arms. Some months ago Henry Kissinger

was quoted in the International Her-

ald Tribune as saying that one of the

questions before him was, "How can we win in El Salvador." The answer.

in two words: Change sides. Help the

people - even if some call them-

selves Marxists - 10 rid themselves

of the psychopaths who have been and continue to be sustained and protected by U.S. arms and money. If the Soviets have been able to get a toehold it is the result of generations of corruption, greed and brutality in the region, confounded by dip-

lomatic ineptitude and rigidity.
If U.S. troops now fight in El Salvador, how long before the entire re-gion is involved? How many millions of tons of hombs to "pacify" Nicaragua? And how long before the Hispanic population of the United States becomes affected? God save El Salvador, and God

save the United States.

PAUL McNEILL. Fribourg, Switzerland. The contradictory nature of two reports in the International Herald Tribune last month ["Salvador Right Blamed for Most 82 Killings," Feb.

10. and "Shult: Assails Salvadoran

Insurgents," Feb. 18) only serves to

nary people - not merely hardened left-wingers - that the present U.S. administration's policy in Central America is shameful,

The president. Secretary Shultz and others in the administration are prepared to lie and issue all manner of false propaganda in their attempts to justify their continued support of the vested interests of a handful of multinational corporations and their bedfellows, the local oligarchy. The other, and more salable, ra-

tionale for so doing is to prevent the spread of communism in the area. In fact, the brutal excesses of the right and U.S. hypocrisy only reinforce the just resolve of the insurgents. Whatever ideological beliefs one

halds, it is undeniable that the human rights situation in Nicaragua has improved considerably since Somoza was deposed. I suggest that the United States government has little interest in human rights. JOHN H.D. WHITMORE BART.

SCIENCE

Man and Imperiled Gorilla In Rwanda's Dense Jungle

By Alan Cowell

New York Times Service:
VIRUNGA MOUNTAINS.
New Mountains boutering Rwanda and Zaire motions to the members of his small group to be still Rare and endangered mountain gorillas, which are capable of crushing a human skull with a single bite of their large jaws or of easily break-ing a neck with arms that span sevon feet, have been sighted in a

dearing in the thick jungle. The guide curits a kind of long, rolling belch. He is, in deference. using ape language, and be is sig-naling peaceful intent.

The group has trekked through mud slides, bamboo thickets and damps of wild nettle and rough gass to make a passing acquainback on the evolutionary time scale. The paths before they petered out have been steep and slick, the nettles aggressive and the heat has been enveloping. Now the moment has come.

The group amist close up, for the 2011llas, who do not tike to be surmended, prefer to see their visitors all at once and in one place. They at in an open space on the other side of a precipitous ravine. Grunt-ing and belching, the guide moves forward, down and then up the sides of the ravine, cronching on his harmches and ordering the visitors to do the same. These primates do not like to feel threatened by the physical size of their visitors, so the humans try not to seem taller than they. And it is difficult to look the gordlas in the eye for long with-

out angering them.
The gorillas' leader, known as Name by scientists studying the endangered species, is a 12-yearold silverback, as mature males are called because of the white hair on their backs. Notume once lost a hand in a poacher's snare, leaving him less powerful than rival patriarchs from other groups. A few weeks ago, other silverbacks came and took his females away, so there are only males in the group now. There is a baby, too, whose mother has died, so Ndume has his own single-parent family and tends the little one.

When the chips are down, numans are certain to value their own survival above that of the 240 remaining mountain gorillas who lumber and lollop around these upper jungles. (Another 120 gorillas have been reported 25 miles farther north in Uganda, in the Bwindi forest area. But there is some confusion among, scientists, as to whether they are of the same mountain-gorilla species. A 1979 study by researchers from Cambridge University, for example, listed them differently, as Gorilla

gorilla beringel.) But since the chips are not yet down, and humans still have the having of choosing, the gorillas still have a claim of protection, particu-- larly from those greed-fueled folks people who lopped off Ndame's hand.

Gorilla hands or feet can be removed by the poachers and sold for ashtrays or souvenirs. Severed skells are sold as well and, on occasion, entire families are slaughtered, except for the babies, who are stolen but whose chances of survival beyond their half-light-

ed verdant world are nil. in 1960, there were 450 mountain gorillas living here, among the extinct volcanoes that form one of Africa's most spectacular and least controllable borders. Human encroachment has reduced their num-

versity of Florida.

bers, and the question now is how much longer, and by what means, the gorillas will be able to survive.

It is, perhaps, the region's most dramatic territorial joust between humans and animals, for Rwanda, a tiny country the size of the state of Maryland, at Africa's landlocked beart, is the continent's primeval past, most densely populated nation, and its growth rate of more than 4 percent a year means that its population will double, from 5 million to 10 million, in the next two decades. Those people will need land. And part of the land they want is now home to the gorillas.

The contest has other dimensions, 100. The area where the gorillas bve, chewing away their days on wild celery and other greenery, is Africa's oldest national park, In, the colonial era, it straddled the frontier between Zaire and Rwanda, then Belgian possessions. Independence has brought disparate fortunes and styles to the two nations; these days it is generally ac-knowledged that while the Rwandans are making the effort to com-bat poachers, the Zairians are not.

According to conservationists, the gorilla population has stabi-lized over the last two years because of Rwandan efforts to con-trol poaching. But last November a group of poachers, thought to be grunts, and Ndume grants back Rwandans, attacked a gorilla family to steal a baby. At least one of the silverbacks was killed; a Rwandan guide says the toll was higher, but neither foreign conservationists his 350 pounds of raw, latent powers. Rwandan officials was a standard and the grunt he makes seems to well up from great depths, betokening but neither foreign conservationists. nor Rwandan officials are pre- cr. A man might look at Ndume pared to discuss the incident lest and he would look back, and the anyone should come to believe the man would acknowledge to himself great primates are being neglected.

Of the 120 gorillas who usually live on the Rwandan side of the border, about 25 have become accustomed to human contact. For three years, foreigners have been running a gorilla project, combining conservation and anti-poaching efforts with a limited and con

trolled program of tourism that is niz and died. Others are lost in designed to bring in revenue and to traps and snares. The rest, throwallow visitors to approach the huge backs to prehuman days, remain black apes in their natural habitat. pawns in a competition they did That is the only way to see them at not create and, on their own, can-close quarters, for the mountain not win. gorilla has never survived in captivity. No zoos for these citizens of a

The visitors nudge nearer, on all fours, the guide still grunting a greeting of benignity. At first, Ndume seems indifferent, leaving younger males to cavort for the group, with much thumping of chests, gnashing of teeth and mock battling, chasing one another up the dense walls of the ravine, the rolling down again, locked in a wrestler's hold, back into the hot and humming fly-filled glade.

Ouddenly, Ndume makes his move, an electrifying moment. He stands on his hind legs and

lumbers across the glade to investigate. Like people hoping a well-meaning intrusion doesn't suddenly turn into a barroom brawl, the visitors cast their eyes down. Ndume seems relaxed and lies on the ground within touching dis-

The guide, as if he were the that, if it came to it, there would be no contest. Ndume knows this, too. He does not have to assert himself;

there is no challenge. Yet if tourists can come this close to the nonaggressive giant, so, too can the poscher, who presumably also grunts and belches his way into favor, but then attacks with spears and gun. Not far off sits a Rwandan game guard, with an automatic rifle, protection against the Thinning Ozone Layer

poachers.
The habitnated groups, at least, should be safe. Their progress is ebarted daily, and their whereabouts are known. In this family, Ndume reigns supreme. The group contains another big male, Mikono, but he is not yet mature enough to have the silver band across his back. He sits a little aside, offering no challenge When the boisterous youngsters become too violent in their play, Ndume utters three short grunts Name utters three short grunts. Immediately they end their fray and signal acquiescence by making the same "peace" grunt as the guide. One young male, with casual familiarity, flops down beside the guide and rests a hand on his lap. The guide grunts and the gorilla looks at him with apparent fond-

U ltimately, they may all die out, these gorillas, victims of advancing civilization, or of cruelty, greed or perhaps just evolution. Even as the tourists sit among them, the sounds of the villages below the mountain drift through the creepers and lianas of the rain forest, drums and songs and music. Humanity is not far off, and, in the tradition of the society down there, the elders provide the young ones with land. Soon, there will not be enough land, valuable for crops and as a

source of wood, to go around.

The United Nations Environment Program wants to designate the park and its environs an area for special conservation. And, according to Jean-Pierre van der Beck, director of the mountain gorilla project, Zaire has recently shown signs of interest in improved policing against poachers on its side of the border. Money, however, is short, and the mountain gorilla project is a shoestring operation. The apes, meanwhile, go their own way, driven higher up the

mountains into colder regions where some have caught pneumoStudying the Chemistry of Joylessness

By Abby Avin Belson New York Times Service

NEW YORK — It's not a matter of being In miserable, necessarily, but rather an in-ability to be happy, an inability to have fun on a vacation, to be exhibitated by a personal triumph, even to enjoy common sensual pleasures.

Though such joylessness has had a scientific name — anhedonia — for nearly a century, i has not been well understood. The term itself was coined in 1897 by a French psychologist. Théodule Ribot, who used it to refer to "an insensibility relating to pleasure alone," in con-

trast to analgesia, an insensibility to pain.

Now a growing number of scientists suspect that at least some victims of anhedonia suffer from a shortage of chemicals that the brain normally releases during the experience of pleasure Moreover, they suggest that studies of the chemistry of joylessness may lead to better treatments for addiction and depression.

Low pleasure capacity has been attributed to many factors: genetic predisposition or drug use or terrible experiences. It has been reported, for example, in Holocaust survivors.

Anhedonia is not listed as a disorder in the diagnostic manual of the American Psychiatric Association. Instead it is regarded as a symp-tom of several disorders. Whether anhedonic people without other known problems are mentally ill" is open to argument

Some authorities, like Dr. Paul Meehl, a psy-chologist at the University of Minnesota, think there are people who are not emotionally ill, but find life difficult because they can't balance unpleasant experiences with pleasant ones. As a symptom, however, anhedonia is seen in schizoenics and in some but not all people suffering from decression, According to Dr. Donald Klein, director of the Department of Therapeutics at the New York State Psychiatric Institute, the difference between anhedonia and depression is that while anhedonics sense no joy, not all of them suffer from the feelings of deep sadness or the eating and sleeping disturbances

old hospitalized for addiction to both stimulant look like fun but after a few minutes I'd want to of endorphin studies. try something else," she recalls. "When I hing out with my friends, I knew I should be enjoying myself because everyone else was. When A small study at the National Institute of Men-

other people are having fun, you say 'How come tal Health last year showed increased endorphin

Some evidence that a good time involves brain chemicals comes from experiments by Dr. Aryth Routtenberg of Northwestern Universi-ty. In the mid-1960s, Dr. Routtenberg showed that rats would give up food for the chance to press a treadle delivering electrical stimulation to a brain area that produces the substances norepinephrine and dopamine, two of the neurotransmitters that carry messages between nerve cells. Both chemically resemble ampheta-

In work reported last year. Dr. Routtenberg and a graduate student, Tim Collier, showed that when rats were given the opportunity to stimulate an area in the part of the brain known as the hippocampus they also did so readily. But this time their self-stimulation was less intense, more relaxed. The brain region was one where opiumlike substances called endorphins

appear to be produced.

Some believe the chemical basis of anhedonia can be dangerously overemphasized. Dr. Aaron T. Beck, director of the Center for Cognitive Therapy at the University of Pennsylvania, says, "It is simplistic to make a dichotomy between the psychological and biological component of inability to achieve pleasure, since one can't exist without the other. By limiting the approach to a single concept, people are throwing away all the psychotherapeutic actions as well as the possibility of using drugs and psy-chotherapy together."

Still, the concept that some people lack the chemicals to be happy has contributed to the study of addiction. For years, doctors have known that long after recovery from acute withdrawal symptoms, patients complain of feeling emotionally flat. Shortly after the discovery in the mid-1970s that the brain produces its own opiates, studies began to suggest that external opiates, such as beroin, lower the body's inter-

Two recent experiments have provided preliminary evidence that methadone, a drug used to treat opiate addiction, also lowers endorphin levels for six months, sometimes 12 months, af-Dome anhedonic people don't realize they are ter the methadone has been stopped. "Because missing anything. Others do. Lorie, a 17-year-methadone depletes the supply of natural chemter the methadone has been stopped. "Things would Oaks Hospital in Summit, New Jersey, a center Oaks Hospital in Summit, New Jersey, a center

activity after the equivalent of one drink.

It is also suspected that in some addicts anhedonia may be a cause rather than a consequence of drug abuse. Dr. Donald Sweeney, clinical director at Fair Oaks, finds that some former addicts who complain nothing excites them admit the same was true before addiction.

Such suggestions have encouraged researchers to investigate addiction treatments that do not suppress the endorphins. In 1981, Dr. Gold showed that nonopiate drugs that prevent the release of norepinephrine can be substituted for methadone to treat acute withdrawal.

Kesearchers hope to find treatments that actually stimulate endorphin production. One approach being studied at Fair Oaks is transcutaneous electrical neural stimulation, or TENS. which provides a painless electrical charge at some of the skin sites used in acupuncture. The treatment is thought to trick the brain into releasing soothing opiates, as it normally does in cases of genuine pain.

In another disorder, depression, studies of anbedonia offer hope of belping doctors to distinguish between different types of depressive ill-ness and to choose the most effective treatments for each. Dr. Klein believes there are two kinds of anhedonia. One is a pervasive joylessness in which even the satisfaction of drives like bunger and sex brings no rewards. The other is loss of satisfaction in such activities as social interaction, involving the active pursuit of pleasure.

The two types of anhedonia, Dr. Klein has found, correspond to different types of depression. Total anhedonia accompanies the severely depressed states that often run in families and have been linked to shortages of the neurotransmitters norepinephrine, dopamine and serotonin. According to Dr. Klein, patients suf-fering from melancholia, a subtype of depression marked by the absence of pleasure, respond better than other depressives to the drugs called tricyclic anti-depressants.

Researchers at Chicago's Rush-Presbyterian-St. Luke's Medical Center developed a pleasure scale on which depressed patients rated themselves, and found groups similar to those identified by Dr. Klein.

Dr. Jan Fawcett, one of the Chicago researchers, said: "We believe these scores can be used to identify people who are vulnerable to depres-

"Punctuality is the virtue of Kings."

In their research, funded by the Environmental Protection Agency, Dr. Webb and Professor Hilton Biggs bombarded five major crops with ultraviolet light. Soya, corn and citrus were not affected. But crop yields in strains of soft wheat and upland rice were reduced by np to 15 and 50 Dr. Webb said nuclear war could also do serious damage to the ozone byer and her study would help show civil defense planners what might happen to crop production in the alternath. The closer to the equator, the thinner the ozone layer and the stronger the ultraviolet light. So the team wanted to know how crops from temperate areas would grow in more tropical latitudes. Professor Biggs said: "I'm pretty much convinced that the germ plasm of soybeans varies tremendously in response to ultraviolet light. . . . If

we want to move soybeans back to the tropics, where they came from, we will need to incorporate a germ plasm that can withstand a high level of altraviolet." The team intends to screen about 70 different crops for ultraviolet light susceptibility. The wheat subjected to an increase of ultraviolet light became more

Threat to Wheat, Rice

By Frank Adams

GAINESVILLE, Florida — Two of the world's most important food crops, wheat and rice, could suffer if the ozone layer around the arth continues to shrink, according to a study by scientists at the University of Florida.

The layer is a slice of the atmosphere that filters out ultraviolet bight

before it reaches the earth's surface. Scientists fear aerosol sprays using fluorocarbons, now rarely used in the United States but common else-

where, may be depleting the layer. The U.S. National Academy of Sciences has said it could decrease by 8 to 10 per cent by 1990.

Patricia Webb. co-author of the University of Florida study, said that for every | percent decrease in the ozone layer, the intensity of ultraviolet ight reaching the earth increases 2 per cent in the southeastern United

susceptible to the wheat rust fungus, the scientists said.

All the wheat in their field experiment was inoculated with rust spores.

Only 35 percent of the wheat receiving normal sunlight caught rust, but about half of the plants subjected to a 23 percent increase in ultraviolet showed symptoms of it. Yields fell 10 to 15 percent.

A separate study by a second team at the university has concluded that carbon dioxide also present in the convenient gright have a hemoficial

carbon dioxide, also present in the atmosphere, might have a beneficial effect on soya. The team leader, Hartwell Allen, said that when they raised the carbon dioxide level by 36 percent, soya plant yields went up 20 per cent. When the amount of gas was more than doubled, the plants produced to 10.50 accounts when the same than doubled, the plants produced up to 50 percent more bears.

Aumospheric levels of carbor dioxide have been increasing since the Industrial Revolution, as man burns up fossil fuels. Dr. Allen said the level was now 20 percent higher than in 1860 and 10 percent above 1958. But the beneficial effect on soya yields, however, is more than outweighed by the possible harm of a carbon dioxide buildup.

The New Face in Fashion Is Sultry, Saucy and French ALL STREE

By Jean Rafferty

For years, the healthy, freshfaced models who have filled the fashion magazines and romped and stomped the international fashion runways with the most successful sparkle have been as all-American as the proverbial pie - a look epitomized by Texan super-star Jerry Hall. Now glamour — French style — is back. The combination of distant elegance and spontaneous wit possessed by 5foot 11-inch 25-year-old aristocratic French beauty Ines de la Fressange is creating the kind of elec-tricity with fashion audiences that At the ready-to-wear showings

- Italy last week, Paris this week and New York next month - Ines modernity, spiced with an irresuble humor, that Hermès women's wear designer. 22-year-old Eric Bergère calls the "new classic" and has captivated such big name designers as Karl Lagerfeld and Dior's Marc

Lagerfeld, who has often used Ines for his Chloe shows, chose her for the press photos of his first Chanel haute countre collection French girl ... amusing, very cool, very detached, very chic. A classic beauty whose face is just perfection." he said.

Dior makeup artist, Tyen, who worked with her for a striking series of makeup publicity shuts, calls Incs "incredibly beautiful, with a very Latin look, like a Botti-celli woman." Like many of the Paris fashion crowd, he insists this top French model isn't really a model at all. "When you photo-graph lines, you're not photographmg a model, you're photographing

a personality."

When Hermes started giving fashion shows five years ago and enthusiastically turned to Ines, whose family were longtime enstumers, it was the beginning of a mutual love affair. Next month's

By Marilyn August

DARIS - Nn chauffeured limousines are parked illegally out front, no uniformed door-men let you in, but Minim's — its name a pun on Maxim's — has been dishing up French style fastfood to the fur-clad set since it opened two months ago.

Just a stone's throw from Lanvin and Hermes, in the heart of the world's classiest shopping district, Minim's, owned, as is Maxim's, by Cardin, offers traditional French favorites at prices even the raincoat-clad tourist can afford.

can choose from a limited but adoquate menu that includes two daily specials, jellied eggs, sandwiches, quiche, salad, dessert and coffee. This red-carpeted Art Nouveau

eaterie fashinned somewhat after Maxim's, Cardin's more elegant dining establishment just a few blocks away on the Rue Royale, is decorated with mirrors and fake Tiffany lamps. The walls are covered with colorful but garish nature-with-nymph scenes protected by Plexiglas, Minim's, which seems to cater largely to women over 40, has 20 tables and feeds between t00 and 150 customers during the luncheon period.

The magnificent carved wood bar attracts the gray-flannel-suit sel, and is a convenient place to meet for a quick drink, lunch or

Already Minim's has established own reputation as a haunt for the rich and famous. The restaurant has played bost to Canadian rock star Robert Charlebois, French singer Marie Laforêt, members of Iran's royal family, relatives of former President Valery Giscard d'Estaing, and of course Cardin

First advertised as a soup and sandwich shop for the weary but well-heeled shopper, Minim's food, alas, is a come-down for serious caters. The 7-franc ham, liver or rilletter sandwiches are bite-size, and merely whet a hearty appetite. Big-ger ones can be had for twice the price, but they are not twice the size. The quicke lorraine and mushroom tart at 16 francs each look as ough they were meant for dieters or children. And what's worse, these delicious French stand-bys taste like the silver Stryrofoam

trays un which they are served. Said a disappointed UNESCO diplomat as he opened his airplanesize bottle of Bordeaux. This is high-tech, high-gloss food for the jet set while they're on the The reason is simple. Minim's

food is prepared at either Maxim's one of the two 35-franc plats du our, which change daily. On a recent day, the lasagna spe-fore long.

icious, seemed to be a big crowd pleaser. The portions were agreed ous, and by I P.M., there was note

WALL STREET WATCH

By EDWARD ROHRBACH

Emerging Growth Stocks Fly A Volatile, Profitable Course

merging growth stocks, high-flying performers since Wall Street's blast-off last August, are continuing to orbit well above the rest of

Dean Witter's emerging growth stock group — now 30 issues — rose three times as much as the Standard & Poor's 500-stock composite in February, and in the seven months since August the stock have soared percent, more than 2.5 times the 38-percent gain for the S&P 500.

Half the stocks in the group have doubled in price during that time—
none has gone down—with SCI Systems, up 173 percent, leading the
pack On its heels are Micom Systems, Policy Management Systems and
Sensonmatic Electronics, all with gains of more than 150 percent.
However, William J. Ritger, Dean Witter's analyst of emerging growth
stocks, warms that the group's high volatility works both ways. During
the June-September 1981 market slide, the 20-percent decline in the price
of the group far exceeded the 12-percent deep in the S&P 500 has ested

of the group far exceeded the 12-percent drop in the S&P 500, he noted.

'll the market we're in falls shruptly. I wouldn't be surprised so see these emerging growth spocks plummet 2.5 times the 500's If your goal is to get decline," he added. rich, this is the way to

Yet he maintains that the goup's fundamentals remain very strong "Earnings should outperform those of the S&P 500 in all economic environments," he said. During recession year 1982, when the 500's earnings dropped about 12 percent, this group's earnings grew an estimated 29 percent."

For 1983, during the expected recovery, he projects that the group's profits will be about twice those of the S&P 500 and, during the next five

do it. Big companies

are not rapid

growers.'

years, nearly unpie.

Mr. Ritger called the financial positions of the group solid, noting that long-term debt averages only 9 percent of total capitalization, compared with an estimated 40 percent for the 500. Furthermore, he said, the managements are well regarded and the companies have relatively few

managements are well regarded and the companies have relatively few political, regulatory or foreign risks:

"Although the stocks' current yields are well below those of the 500, and their prices are highly volatile and subject to sharp setbacks in market corrections, valuations on the stocks still appear to be conservative.

"Even though one must pay a premium P/E on projected 1983 earnings for the emerging growth stock group, the premium is not nearly high enough to equate expected returns from the two groups. If the \$8P 500 were to sell in 1988 at a P/E 10 times that year's earnings, it would have no have appreciated by \$0 percent.

were to sell m 1988 at a P/E 10 times that year's earnings, it would have to have appreciated by 80 percent.

"If the emerging growth stock group is able to maintain a P/E premium—as it should, given the group's superior earnings performance—its price rise should be far higher. The group would have to jump in price 151 percent to sell at 15 times projected 1987 earnings, 235 percent to sell at 20 times, and 319 percent to sell at 25 times. And certain of the individual stocks married to prove the stocks married to be the stocks." individual stocks would do much better than the group as a whole."

Asked why emerging growth stocks, despite their spectacular performance, still lacked widespread appeal, Mr. Ritger said that there was a "public misconception" about the stocks' speculativeness, and that many investors emphasize what they perceive as preservation of capital.

"But if your goal is to get rich, owning these stocks is the way to do it," he asserted. "Big companies are not rapid growers."

Another factor in the market's neglect of growth stocks, he said, is that large institutional investors dominate wall Street now and the relatively modest, market value of emerging approximate tooks (two thirds are listed

modest market value of emerging growth stocks (two-thirds are listed over the counter) makes them unacceptable as investment vehicles.

Quotron a Top Choice

Mr. Ritger said purchasers of these stocks fit mainly in three groups:
1) sophisticated individual investors, 2) special funds broken off from bank and pension investments and 3) small money managers bent on achieving high performance in their portfolios.

He said another thing that apparently puts investors off is that no sock on Dean Witter's emerging growth list sells for less than \$20 a stare, relatively expensive for OTC issues.

"It's because so many of them have doubled and tripled, at least," he said. "Quotron, for example, is up 700 times - not percentage points -

Quotron Systems remains a top choice for Mr. Ritger, along with Network Systems. Other stocks in the top five are NBI, Newport and Safeguard Business Systems, Rated just behind them are SCI Systems, Micom Systems and DEA. Two stocks added this week are Matrix and Systems & Computer Technology Corp.

This "ten best bets" portfolio gained 22 percent in the first nine weeks of 1983. Mr. Ritger noted, against an S&P 500 advance of 9 percent.

Morgan Stanley is less cheery about the group. Using as an index the T. Rowe Price "New Horizons Fund," a \$1-billion portfolio invested in 150 emerging growth stocks, Dennis G. Sherva, analyst at Morgan Stanky, notes that the fund's relative price/earnings ratio has recently grown to double that of the S&P 500.

"Therefore, when in a rising, ebullient market emerging growth stock prices rise to a level where they fully discount their superior fundamentals, the game is usually about over," he said. International Herald Tribune

Decline On NYSE

Compiled by Our Staff From Disparches NEW YORK — A final-hour burst of selling pressure in oil and technology issues pushed prices lower on the New York Stock Exchange Wednesday. Volome rose from recent days.
The Dow Jones industrial aver-

age, which was higher most of the day, closed at 1116, off 8.52 points. Volume rose to \$3.6 million shares from Tuesday's 61.8 million.
Losing issues led gaining ones eight to seven among the 1,909 issues traded.

The government said Wednesday that U.S. housing starts were up in February, rising 2.9 percent to a seasonally adjusted 1.75 million units. The report came as a pleasant surprise to some econo-mists who had expected a drop. In another positive report, the

government said factory utilization was up again in February.

The stock market, which had soared on the basis of January's rosy economic reports, has been confused about what to expect from the recovery, Hugh Johnson of First Albany said.

When data such as disappointing retail sales figures emerged early this month, "it looked like the economy was weakening and the market declined," he said. "On Tuesday, the industrial production numbers were released, and they weren't all that discouraging. To-day the capacity utilization figures were better than expected."

Although there was little immediate response to OPEC's agreement on an oil-price cut earlier this week. Monte Gordon of Dreyfus Corp. said investors were slowly responding to the news.

"I suspect the market began moving forward on the assumption the OPEC agreement will hold at least temporarily," he said. But, he added, the market is still

"confused about the character and quality of the recovery. There's been backing and filling because of

Sterling to Try to Challenge Dominance of Tylenol in U.S.

By Pamela G. Hollie New York Times Service

NEW YORK — For Sterling Drug Inc., the maker of Bayer aspirin, the recall of Johnson & Johnson's Tylenol last September presented an unexpected op-portunity. Sterling had for years been trying unsuccessfully to break Tylenol's grip on the pain-reliever market, and the sudden vulnerability must have seemed just the right time for Sterling to try again.

It was also an opportunity for the company to gain a foothold in the aspirin-free pain-reliever market, something that it had been refusing to attempt in recent years despite a decline in demand for aspirin

Accordingly, analysts say, Sterling decided to introduce its Panadol drug, a nonaspirin pain reliever sold only overseas for the past 25 years, into the United States next month, "This marks a significant change in company strategy," said David Crossen, an analyst at Smith Barney.

John Connalion, market analyst for Shearson/American Express, said "stocks that are big energy producers are getting bit."

Oil-service stocks were big losers on the day after a Morgan Stanley analyst lowered his estimate on the company's line "will provide the right over-the-company's line "will provide the right over-the-company size and smith Barney.

Typically, Sterling's chairman, W. Clark Wescoe, a physician, would oot comment on the iotroduction of Panadol. And Walter C. Camas, president of Glenbrook Laboratories, the drug division of Sterling, would say only that the addition of Panadol to the company's line "will provide the right over-the-company size and the lost of the

ter pain reliever for almost every need."

But the company has allocated \$100 million to pro-

clearly hopes to make more than a ripple. In particular, analysts say, Sterling's target is Tylenol.

There is a catch, however, and that is that Tylenol, in the six months since seven people died after ingest-ing capsules that were laced with cyanide while on store shelves, already has recovered most of its mar-ker. Thus, analysts say, the Panadol strategy may be an example of Sterling's coming up with too little, ton

Johnson & Johnson received a second blow earlier this month when it was forced to withdraw from the market its prescription drug Zomax, Zomax, a popular pain reliever, had been linked to five deaths from allergic reactions. Johnson & Johnson said it was withdrawing the drug pending relabeling. The compa-oy announced that the recall would cost the company \$20 million in after-tax earnings this year.

In 1978, Sterling tried to compete with Tylenol directly by introducing an aspirin-free Bayer. But the product failed to take hold against its more beavily promoted competitors. Bristol-Myers' Datril, American Home Products' Anacin 3, and, of course, Tylenol, the market leader, which had been introduced three years before. As it turned out, the nonaspirin Bayer, which had become known throughout the industry as the "nonproduct Bayer," had to be (Continued on Page 11, Col. 1)

Spot Oil Market Seems to Expect More Price Drops

By Peter Calvert

ROTTERDAM - The spot oil market returned an open but high-ly skeptical verdict Wednesday on OPEC's ability to stem a decline to the world price of oil with OPEC's

new price-and-production package.
"Watch the spot market," said industry executives after Monday's decision by OPEC to cut prices for the first time since the 1973 Arab oil embargo. Its reference price was cut to \$29 a barrel, from \$34.

The Organization of Petroleum

Exporting Countries' package also pinned members to mandated production quotas, intended to erase surpluses in the market and defend what most experts saw as still an artificially high price at a time of low, recession-reduced demand.

OPEC prices are set for longterm contracts. But when buyers and sellers disagree on contract prices, the seller dumps his oil at the going rate in the free, noncontract "spot" market - which thus acts as an industry barometer of where a noncartelized price ought

After two days to think about it, spot traders appeared Wednesday to share the skepticism about OPEC of Donald P. Hodel, the U.S. energy secretary, who told a Senate subcommittee in Washington Tuesday night that he expected oil prices to fall to the "mid-20s range" before finding a bostom.

Nobody rushed to buy spot oil,

but traders said that pricing pro-posals Wednesday were slightly down from those of Tuesday. Buyers Wednesday offered to pay \$28.10 for a barrel of North Sea Brent crude, an actively traded

oil, down from agreements made Tuesday at \$28.30 to \$28.50. Mr. Hodel said he doubted whether OPEC could restrain its production to remove the over-supply in the market, Meanwhile, traders suspected that the \$29 OPEC price would be undermined by con-OPEC sellers not bound by cartel rules, chiefly Britain, debt-plagued Mexico and the Soviet Un-

Britain was OPEC's biggest immediate problem. With buyers ng to desert it, oil industry sources said Britain was all but certain to cut its North Sea oil price within a week or two.

The sources said the OPEC agreement should reduce oil-refining losses in the short term as the gap narrows between product pric-es and official government crude selling prices.

But they have little confidence that the improved margins would last long because refiners would continue to turn to the spot market as the need remained to cut losses incurred from running high-cost OPEC crudes through refuneries, the sources said.

They said it was difficult to define the level to which crude prices needed to drop before refineries would break even on their opera-

Refiners' margins differ according to the types of refueries and the products sold, but various oil sources agreed that the price of the OPEC marker crude would need to fall toward \$26 a barrel before companies could made a profit from refining oil for gasoline sales in Britain.

Buyers said that Britain, at the least, would have to undercut Nigeria, an OPEC member, to remain competitive. But if it does that, it could provoke OPEC ioto a retaliatory price reduction and start a new slide, toward \$25 or even \$20

Mexico cui prices within hours of OPEC's move, but aligned itself to the \$29 reference level. The Soviet Union has cut prices from \$29.25 to \$28 a barrel.

EMS Tensions Constrain Bundesbank

BUSINESS BRIEFS

C.H. Butcher Plans Bank Firm With \$1 Billion-Plus in Assets

KNOXVILLE, Tennessee (UPI) — C.H. Butcher announced plans Wednesday to join 12 Tennessee banks in a holding company with assets of more than \$1 billion. C&C Bank, the flagship of Mr. Butcher's banking empire, with assets of \$2445 million, would be included, as would United Southern Bank of Nastiville.

Mr. Butcher would finance the company with more than \$30 million in capital and equity, including his home in Knoxville. Mike Butler, Mr. Batcher's spokesman; said the home had been appraised at more than \$1

Ownership of the home, "Butchivite," was transferred to a Miami attorney on Feb. 11, the last business day before the failure of United American Bank, run by Mr. Butcher's brother, Jake.

C.H. Butcher controls 13 banks in eastern Tennessee and 11 in Kennicky, mostly in rural counties. Formation of the holding company awaits approval from state and U.S. banking regulators.

Mexico's Dollar Account Rate Up

MEXICO CTTY (UPI) — Mexico has increased by 32.5 percent the rate its banks repay investors holding frozen dollar accounts, according to a government spokesman.

The decision Thesday marked a partial reversal of policies established under former President José Lopez Portillo, who froze the dollar accounts in August. There was about \$12 billion in the accounts when they were frozen. About \$1 billion is believed to be left.

Mr. López Portillo had set the repayment rate on the accounts at 70 pesos to the dollar, or nearly half the free market rate at the time. Since then the government has slowly increased the rate, offering 80 pesos to the dollar last week and now 106 pesos. The free market rate is 149 pesos

Insurer to Buy Continental Stake

HOUSTON (AP) — American General Corp., an insurance holding company with more than \$13 billion in assets, will buy about 20 percent of Continental Airlines for \$42.5 million, according to Continental offi-

They said Tuesday that American General would purchase notes and warrants convertible into Continental's common stock over the next five years. The notes will mature in 15 years, carry an 11-percent annual interest rate and be secured by certain facilities at Los Angeles International Airport

Frank Lorenzo, president of Texas Air Corp., the parent company of Continental, said the airline's board would elect Harold S. Hook, chairman and chief executive officer of American General, as a director. American General announced meanwhile that it was seeking a purchaser for its Opryland properties in Nashville, Tennessee.

\$880-Million Loan Deal for Peru

WASHINGTON (WP) - Pern's major bankers have devised an eightyear, \$880-million loan package to keep the country affoat financially for the next 12 months. The package, put together by 10 major Western banks advising Peru, needs the approval of the other 255 banks that hold

Bill Rhodes, Citibank's senior vice president in charge of Latin American lending, said Tuesday that the other banks would be asked to refinance \$430 million in loans that come due by next March, and to lend Peru an additional \$450 million. Peru owes foreign creditors \$11 billion. Mr. Rhodes, chairman of the 10-bank advisory committee, said banks also will be asked to keep up the \$2 billion in short-term credit outstanding to Peru. Peru is to pay interest on the \$880 million until 1986, then pay off the principal in 11 semianonal installments.

Philips, Saudis Discuss Contract

AMSTERDAM (Reuters) — Philips is negotiating with Saudi Arabia for a 1.5-billion-guilder (\$577-million) order to follow up telephone equipment and construction contracts that Philips and L.M. Encsson have received since 1977; a company spokesman said Wednesday. The spokesman said he had no further details on the talks. He said the original 1977 contract, to extend and modernize Saudi Arabia's tele-phone system, had yielded orders totaling 12 billion guilders for the two

64 Oil Tracts off Alaska Leased

ANCHORAGE, Alaska (UPI) - Eleven oil companies have paid the U.S. Treasury \$325.3 million to lease 64 of 418 offshore tracts offered in hidding for oil and gas exploration in Alaska's Norton Sound.

Exxon was the big buyer, winning 45 tracts with an outlay of \$264 million. With France's Elf Aquitaine contributing 15 percent, Exxon bought the most sought-after tract. No. 269, for \$41.5 million. Results of the bidding Tuesday confirmed forecasts that the sale would

not exceed \$500 million; Norton Sound is far from the Alaska pipeline and too shallow for some supertankers. On Friday, Governor Bill Sheffield withdraw a threat to sue the U.S. Interior Department over environ-

Company Notes

Martin Marietta has reached agreement in principle to sell four cement manufacturing plants to the Blue Circle Industries Group of Britain and Cementia Holdings of Switzerland for more than \$150 million in cash. Pacific Southwest Airlines has ended discussions with Braniff on forming a Texas-based PSA division.

Internorth Inc. of Omaha, Nebraska, expects 1983 capital spending of about \$385 million, compared with \$420 million last year.

Carborandam announced Wednesday that it was withdrawing from the abrasives business and shutting its bonded abrasives plants in Niagara Falls, New York, and Logan, Ohio, resulting in the loss of about 900

Sterling to Introduce U.S. Rival to Tylenol

(Continued from Page 9)

withdrawn six months later. Next, having failed with its nonaspirin product, Sterling redoubled its ef-lors to push its aspirin products. Once again, the target was Tylenol, and this time the campaign took the form of a direct challenge to Tylenol's advertising claims.

When the ads seemed to suggest that doctors recommended Tylenol, Sterling responded with ads reading: "Makers of Tylenol, mane on you!" The ads contended that doctors do not recommend products by name but simply say,
"Take an aspirin," Tylenol is not
aspirin, the ads observed, and
layer is.

The Bayer ads further attacked e aspirin-free ingredient in ylenol, acetaminophen, as a po-entially harmful chemical that leading experts have expressed

ic Panadol, which is 100 percent the United States after World War

e reason was that Sterling is aspi-

From the look of Sterling's Panadol ads, the company appears to be taking a conservative approach in bringing the drug to the United States. The Panadol ads are straight-forward, without references to competitors. The ads are also careful not to oversell Panadol. In the past, Sterling has been warned by the Federal Trade Commission against promising consumers too

The nonaspirin pain relievers, originally available only by prescription to people allergic to aspirin, have been sold over the counter for 10 years. In recent years, their share of the overall market has been growing and is now more than a third the size of aspirin's. Bayer aspirm is Sterling's best-

known drug. It also provides the bulk of the company's \$230 million in annual domestic proprietaryproduct sales. Total sales from

reat concern about."

In the industry, many believed at the Sterling ads had backfired ad only reinforced Tylenol, which ther grew to a \$400-million profit there for Johnson & Johnson In dition, analysts say, the ads left to impression that Sterling was possibly too loyal to Bayer, said Joseph Riccardo, an analyst at Bear Steams, As the market shifted toward nonaspiring mitted to Bayer, a product name to Bayer, a product name. to-aspirin and anti-acetamino that the company acquired after nen, despite the fact that Sterling the West German chemical giant so made acetaminophen drugs Bayer had lost the right to use it in

Indeed, had Sterling not taken a and against the nonaspirin drugs, salysts believe, it might have been used to move more quarkly into the passing market in the Hairball passing market in onaspirin market in the United year, even with a new, coated ates. "They probably should layer aspirin, they were up even use gotten into acetaminophus less, although the company has not made public the 1982 figures for its proprietary drug division. As a creason was that Sterline is again, whole Sterline has company and that whole, Sterling has announced that it had zero growth for all of 1982. .

Alteration

By Stuart Auerbach

Washington Post Service WASHINGTON - The United States has instigated private talks with some but not all of its major allies seeking an overhaul of international trading rules because the

ministration officials say.

The talks, disclosed Tnesday, were described as "low key" and "informal." Yet they have been carried out at the highest level by U.S. trade officials — William E. Brock, the U.S. trade representative, who is the top U.S. trade negotiator, and two deputies.

The administration's move is directed at the 68-nation General Agreement on Tariffs and Trade, formed after World War II to reguste international trade.

U.S. officials said that they are troubled by the "lack of political will" during November's GATT ministerial meeting. That session failed to come to grips with major trade problems, especially barriers being erected against the export of services that brought more than \$100 billion to the United States last year, administration officials

The administration also is deeply disturbed by what it views as GATI's inability to settle trade disputes among its members. This was vividly illustrated by the vacillation of a GATT panel dealing with a U.S. complaint that Europe an government subsidies on ex-ports of wheat flour have burt U.S. oversess sales, officials contended.

Divisions are likely to emerge Thursday when EC ministers meet in Washington with Mr. Brock in an attempt to settle the agricultural differences.

Europeans privately are warning U.S. trade officials that there would be serious reprisals if the United States were to make another move similar to the recent U.S. sale of \$150 million in governmentsubsidized wheat to Egypt. That cut France out of what it had considered one of its traditional mar-

Administration officials believe that the real issue is the way that GATT operates. Three broad areas of possible change have emerged to prod the GATT nations into a serious consideration of the organization's future.

One, which bears the working name of "GATT-plus," would be a group of nations that would agree to engage in freer trade than called for under GATT itself. They could, for example, decide to have completely free, two-way trade between emselves with no tariff or contariff barriers. The problem, however, is that this could upset most-favored-nation treaties.

Another, which has been called super GATT," would create a group of nations to exercise trade kyo is raising \$100 million through leadership. The group would hope a seven-year Eurobond in an intergroup of nations to exercise trade to put its views into the existing est rate swap for floating rate debt, lead manager Credit Suisse First rest of the trading world to join.

sources do not always compensate Mr. Friedman said banks should have paid more heed to the flight

of Mexican capital ioto the United "you knew something big and important for lending decisions."

At Lloyds Bank International, Roger Seggins, manager of syndi-cated lending, suggested that coun-try risk watchers should pay more attention to conditions in the lending market For instance, he said. the rush by many banks to do short-term business early last year signalled that they were having trouble financing their lending and foreshadowed a squeeze. Outsiders are more critical.

Paul Sacks, a partner at the New York risk consulting firm Multi-narises in short-term borrowing spell tional Strategies, recently studied the way top U.S. banks measure country risk. He found a "very While those countries are tiking to continue fielding it harder to raise funds, the lessons banks have learned over the past few years could help in some respects, nota-could help in some respects. bly by making less likely the kind are individual countries' risks than whose careers depend on selling of liquidity squeezes that have a failure to loresee a worldwide credit. Economists' warnings do slump in commodity prices coin-not always get heard at the highest ciding with a surge in interest rates. levels, be added.

loans risk getting fired. Besides, a British loan officer said. "people living in ivory towers don't realize the pressures banks come under."

At any rate, Mr. Sacks seems to have touched a sore spot.

ing reports." Mr. Davis, the London-based consultant, asserted that top bank executives often are too willing to

approve risky loans in the interest of meeting profit targets. Another problem, he said is the bias of high-level bankers: "The chairman flies in, sees the country for two days and becomes an instant expert." On a similar note, Mr. Sacks warned against chummi-ness between top bank officers and foreign central bank chairmen.

Aside from criticism, the debt problems are leading to some ac-tion and proposals for change. Thirty-five banks from Europe, North America and Japan are set-

ting up the Institute of Internation-Finance, a Washington-based body that is to collect data on debtoations and report to banks. Bankers generally applaud the idea and say it will especially belp banks ton small to have economic

and that those who push for bad tute will have to be discreel lest its warnings create panic among lend-ers and turn self-fulfilling.

Banks also ought to work more closely with the loternational Monetary Fund, said George Clark, an executive vice president Economists don't always get it at Citicorp io New York. He alright either," an American banker lowed that the fund cannot share retorted. A British banker said that all its inside information but said it while he is lining up business, the should "give a wink" or show a economists are "sitting back wril- "thumb's down" when bankers need to be warned about a country's financial troubles.

Brian Griffiths, dean of the business school at City University in London, suggested that banks put outsiders on their credit-allocating committees. "Otherwise," he said, "the thing becomes almost too in-

Some bank economists, for their part, believe they will have to speak up a little more

At American Express, Mr. O'Brien funds that his bank's rating system, which ranks countries from A to E, gets attention. A five-page report may go unread, he observed, but "you pull the rating down and everybody notices. It is then up to the economist to explain the niceties, he said.

Diek Sargeant, group ecocomic adviser at Midland Bank in London, said economists may have failed to express their warnings with sufficient force. "Perhaps dropping hints is not enough," he said.

U.S. Factory Use Up for 3d Month

facturers increased factory use in February for the third straight month, the government reported Wednesday. A big gain in auto out-

put was a main factor.
The Federal Reserve Board report said factories operated at 68.5 percent of capacity, a 0.2 percentage-point increase from January, which was bound to be seen as yet another sign of recovery from the

The Commerce Department's chief economist, Robert Ortner said that factory use was still low - it was at 79.8 percent when the recession began in July 1981 - but that it could be expected to continue to rise during the spring and

With so much factory capacity still idle. economists say the recovery will get no boost soon from corporate spending for expansion or modernization. But Mr. Ortner said such a pickup might be expected later this year,

The February increase in factory use had been expected in light of

Washington Past Service

SOUTHFIELD, Michigan — American Motors Corp., which stopped releasing 18-day aris figures in January 1979, largely because sales were so poor, has published a report for the beginning of March, rejoining Detroit, the automakers.

The figures published Taesday showed why the company ban on reports was fitted Suring sales of AMC's front-wheel-drifts Alliance, in troduced in September. "We've got sometime here," said W. Paul Tippett, who has, been AMC's chairman and chief encentwe officer since January 1982. "We've selling as many Alliances as we can make."

AMC sold 4,500 cars in the United States in the first 10 days this mouth, a 36-person increase over the estimated 2,300 new, cars disald in early March 1982. Alliances accounted for 3,200, or 71 percent, of the latest sales.

An estimated 59,850 Alliances have been sold in the United States and Canadia sance September, accounting for 61.5 percences false 125.50 AMC cars sold in both countries since them.

But Mr. Tippett said: "We don't was in he thought of as the Alliance car company, we've got to come out with more high similary products. We don't want this things to be out his splash, after which nothing follows for the out here more years."

He said AMC's failure to consistently for duce better products led to its poor domeste performances in the past.

He said AMC's failure to consistently the duce better products led to its poor direction performances in the past.

"During the period of the 70s, AMC performed erratically, both financially and in the marketplace," said Mr. Tippett We him duced a new product that might do neity self-but then we would do nothing else for a fittle winle and come back down because there was not a self-but stream of products out there in support the company over a period of time."

He said AMC was now trying to design more consistent product stratery, "wife 186.

leap into print.

WINTER SEASON

By Toni Bentley. 150 pp. \$11.95. Random House, 201 East 50th St., New York, N.Y. 10022.

Reviewed by Jennifer Dunning ...

THE New York City Ballet has which includes a useful listing of L been one of the most import- Martins's roles and ballets. ant arts institutions in 20th-century America, and certainly one of the most influential forces in American dance. The history of the company, its school and its founders, George Year, Christopher d'Ambose has its school and its founders, George Balanchine and Lincoln Kirstein, given us a portrait of that dancer that is lively and touching at its best but which, at its more frequent has been recorded in a number of valuable books. But there has been relatively little by or about the per-formers themselves. Three City Ballet dancers have now written "Leap Year" takes the soloist, now 23 years old, from his first awkward days in City Ballet to a lead role in "Fancy Free." all in his 18th year. D'Amboise is in low with words, which he uses as brezity as he makes use of the classical.

about themselves and the dancer's No one interested in the company should miss reading "Far from Denmark," written by Peter Martins with Robert Comfield, Martins is, of course, a City Ballet lead dancer, choreographer and ballet-master, and the likely heir to the company directorship. Here he provides the acute perspective of an outsider who has moved to the heart of it all, in an account that

has all the clarity of his dancing.
The 36-year-old principal dancer
began his life in ballet as something of a rebel at the Royal Danish Ballet School in Copenhagen, widely disliked but imbued with a "self-sustained" belief in himself. Life at City Ballet, which be joined in 1969, was at first comparable.

It has been said that the Danish dancer would be a glittering international superstar had he not chosen to apprentice himself to Balan-chine and his resolutely starless company. But it was there that Martins became the performer he is today — a "platonic" dancer, as Cornfield puts it, whose brilliant apprehension of classical technique tempered with a lucid, thought-

ful approach to style and what appears to be absolute comfort with his big physical stature.

To be a Balanchine protege, it seems, is to be stripped to essentials, often without much clear consciousness of the process. Martins's apprenticeship was a difficult one. apprenticeship was a difficult one. about life backstage. But there is By the summer of 1972, however, colorful detail about performances he had allowed himself to become danced and observed from the a student once more and the "ac-wings, and about what goes on in tive presence," as Martins puts it, the honeycomb of rooms and suthat Balanchine seeks. He looks up to his mentor, but it is with the af-fectionate appreciation of a junior reader into a threatened denormal

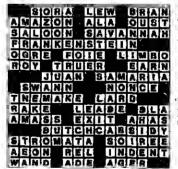

Martins's descriptions of working with the choreographer are among the most illuminating pass.

Magri Upsets Mercedes in Flyweight Title Fight

LONDON - Charlie Magri of last year. Britain won the World Boxing Magri raised his record to 27-2, council flyweight title with a seventh-round technical knockout of Magri, Britain's only current world defending champion Eleoncio Mercedes of the Dominican Republic at Wembley Arena Tuesday

Magri, who had gone into the fight as a 3-2 underdog, opened a cut over Mercedes's left eye during the sixth round and referee Ray Solis of Mexico stopped the contest at 1:14 of the seventh.

Blood was pouring into Mercedes's eye, blinding him, and

defeats, fought superbly.

Mercedes jabbed effectively in the early rounds, but had no answer to Magri's mounting assault. Mercedes, 26, was making his preparing for this fight," he said. "I first defense since winning the bile can do with a rest."

from Freddy Castillo of Mexico

champion, became the eighth Brit-ish boxer to hold the flyweight

Both boxers entered the ring weighing 111½ pounds, eight ounces inside the flyweight limit. "It is great to be world champion after so many people wrote me off," said the winner after the bout,

Mercedes had said he would knock me out. But he hit me with solid punches and I stood there and took them. "When I started hitting him with

body punches, I could feel it made him uncomfortable." Magri, who already holds a vic-tory over World Boxing Associa-tion flyweigh champion Samos Lactar of Argentina, said he plans

to relax before lighting again. "I worked flat-out for 13 weeks

Decker Wins Jesse Owens Award

NEW YORK (AP) - Distance runner Mary Decker Tabb on Wednesday was named winner of the 1983 Jesse Owens loternational Amateur Athlete Award. She is the first woman to win the award, presented annually to the world's outstanding amateur athlete. year, the 24-year-old Decker set world

Of the 26 athletes originally eligible for this year's award, an international panel of judges narrowed the field to three track and field stars the other two being sprinter-long jumper Carl Lewis and decathlete Daley Thompson of Britain.

past Georgia Southern, 64-54. The Wimbledon Increases Prize Money

WIMBLEDON, England (AP) — Prize money for this year's Wimbledon tennis championships is up by around 60 percent, the All-England Club has announced. The men's first prize will be \$112,654, compared with last year's \$75,000. The women's title will be worth \$101,400, against \$67,500 in 1982.

Wimbledon showed a profit of more than \$5.4 million last year. "We vier of Ohio. The Braves will meet felt that in view of the excellent financial results, some of the money ought to go to the players," Sir Brian Burnett, chairman of the All-England Club, said Tuesday.

Hagler-Scypion Bout Set for May

NEW YORK (UPI) — Marvin Hagler will defend his world middleweight title for the seventh time on May 13 against Wilford Scypion in Providence, Rhode Island, promoter Bob Arum announced late Tuesday.

Hagler, who ran his record to 56-2-2 with a sixth-round TKO of Tony

Sibson in February, has knocked out all six previous title challengers and is unbeaten in his last 31 fights. Scypion, 26-3, is the World Boxing Council's top-ranked challenger.

Twice As Much Art for Your Money

If you purchased this Trib at a newsstand, you're already enjoying a rare bargain—the whole world in just a few tightly written, fact-packed pages. You're reading a product created by scores of journalists working day and night from dozens of distant datelines to bring you a compact compilation which can be purchased for the price of a cup of coffee.

But why not double the bargain? Enjoy twice as many newspapers with double the headlines, business trends, candid commentary, high fashion and comic strip hi-jinks, and Art Buchwald three times a week, too.

By subscribing to the International Herald Tribune for six months or a year, you receive each copy for as little as half the newsstand price. Up to 50% off, to be precise. Twice as many Tribs for your money.

Subscribe now and we'll speed bargain-price Tribs to your home or office from our various simultaneous distribution points in Paris, London, Zurich, Hong Kong and

Join the global who's who of thought-leader readers

who turn to each morning's Trib for the latest in objectively reported world news, briskly written opinion, the day's closing business tabulations, buy-and-sell reports from the international market-place, at-the-stadium recaps of just-completed matches, what's happening in the world of culture—and all in an international perspective. Double the value of the Trib by halving its price.

Subscribe now so you don't miss a single issue. Just fill out the coupon below and mail. For maximum savings, subscribe for a full year. This cut-price subscription offer is for new subscribers only.

Please circle below the time period and reduced subscription price selected.

ART BUCHWALD Price of Liberation

WASHINGTON — Behind more costly, because no ex-hus-every liberated woman, band is going to pay for his wife there is another woman who has to do the dirty work for her. l discovered this talking to Lila

Peabody. Lila works for a law firm from 9 A.M. to 5 or 6 or 7 P.M., depending on what case she is in-

volved in. Lila told me she couldn't do it if it wasn't for Juanita. "Who is Juanita?" I wanted to

"Juanita takes care of the house and the children, and cooks our meals. I couldn't work if it weren't for her, and the fact the Safeway stays open until 9 P.M." "You pay her?"

"Of course I pay her," Lila said. "Half my salary goes to Juanita."

"You mean your hushand doesn't contribute to her wages?"
"No. He insists if I want to work I bave to pay somebody to do the things I had to give up when I took

That doesn't seem fair. I should think he would he proud of you for being a lawyer and making it in a

man's world."

"He is, as long as there is some-body at home. Frankly, I think he's prouder of Juanita. She always knows where his shirts are."

"I didn't know there was such a high price for women's liberation " There is if you're married and bave to keep a house. For every liberated woman you see in an office, there is another woman behind

her providing the support system for the marriage. If the woman is divorced and bas children it's even Greek Amphitheater Sags Under Tourists

The Associated Press ATHENS - The ancient stone amphitheater at Epidaurus in southern Greece is subsiding under the weight of more than 500,000 tourists who sit in it every year, the government archaeological service

said Wednesday. The stone seats bave moved several centimeters lower since the theater was built in the fourth century B.C., a spokesman for the ser-vice said. Archaeologists now fear a full bouse of 20,000 spectators at Epidaurus could cause irreparable damage to the structure, one of the largest amphitheaters in Greece.

and also the woman who has to take care of his kids."

"But at least you're a person in your own right," I said.

"I am as long as Juanita doesn't quit. It isn't easy to find someone who will be a housekeeper and take care of the kids and wait until you get home at night. I've been through three Juanitas in two years. One came from El Salvador. another from Ecuador and this one is from Bolivia."

"Your Spanish must be very good by now." "It's perfect, but frankly, we're all getting a little tired of fried

"It seems ironic that in order to be free a woman must find another slave to replace her."

"You have no choice. A husband is willing to go along with a liberated wife as long as things are running smoothly at home. But one breakdown in the support system and then he starts screaming he didn't marry a woman who would igoore ber house and children.

"But every magazine you read in the supermarket features husbands of working wives sharing the household duties."

"The magazines are the only place you see them. The American male will accept his wife doing ber own things as long as she does everything else as well. When we go to parties my husband introduces me proudly to everyone as 'my wife, the lawyer.' When we get home at night, be wants to know why there are no clean sheets on

"It's funny," I said, "Until I talked to you, I thought every liberated woman had it made. I always saw you as someone who had the best of both worlds. Now it turns out that without Juanita mopping floors you wouldn't be li-"You've got the picture," Lila

said. "Any married woman who wants to be liberated better have a good pal in a Latin American employment agency." "What happens when your sup

port system gets sick?" "Then I stay home and everyone in the law firm says. We knew this would happen if we hired a waman

Horowitz: An Unauthorized Portrait

Author of Biography Denies That It's a 'Discreet Hatchet Job'

By Frederick M. Winship

NEW YORK — An unauthorized biogra-United Press International phy of pianist Vladimir Horowitz, which may well be the most important musical hiography of the year, has its young author shrugging off charges of sensationalism. Glenn Plaskin insists his 607-page book (Morrow, \$19.95) is a balanced portrait of

been the stuff of legend for decades. The slender, intense author interviewed more than 600 of Horowitz's friends and associates and said he was careful not to use information from people who obviously disliked Horowitz and "had an ax to grind." He

the 79-year-old virtuoso musician whose

troubled private life and eccentricities have

cited the late pianist Glenn Gould. "The bottom line is that I like Horowitz very much and identify with him," said Plaskin, 30, himself a pianist. "I was chagrined when a reviewer said I'd done a discreet hatchet job. I've tried to show Horowitz's humanity - his strengths and his weaknesses. It's very rare to read a truthful book about a

Plaskin aproached Horowitz and his wife, Wanda Toscanini Horowitz, by telephone several times to obtain their cooperation in writing the book but he was turned down. He said Horowitz told bim, "Forget itl I'll write

my own."

Now Plaskin is not so sure that wasn't a bit of good fortune.

It would have been difficult to write it with him and to have the book resemble what really happened," Plaskin said. "In his taped interviews, Horowitz tells the same anecdotes over and over, and they may be true or he

image and grooming that image." Horowitz bas been an obsession with Plas-

kin since he heard a Horowitz recording of a Scriabin sonata in graduate school. Plaskin began his keyboard studies at age 6 in his native Buffalo, New York. He later studied at the New England Conservatory and the Peabody Conservatory.

"I gave a few recitals a year and I was better than good. I did my three doctoral recitals at Peabody. But after 20 years of practicing, I was tired of the grind. I needed refueling, a change of gears. The idea of the book came to me and I could see there was no time to be wasted because people around

Plaskin left Peabody four years ago and got a joh with a New York concert booking agency. He began phoning publishers with his proposal of a Horowitz biography and fi-nally got the William Morris Agency to rep-

Vladimir Horowitz rehearsing in London last year.

resent him. Morrow won publication rights in a hidding contest and Plaskin got a \$55,000 advance, unheard of for an "author who had never written anything before.

Research and writing took three years, longer than it should because many of Horowitz's friends, associates and former students, such as Byron Janis, were reluctant to talk. Plaskin had to be a detective, ferreting out the correspondence of Horowitz's onetime personal representative, Alexander Merovich, at the University of Oregon.

"Often I was lucky and people would pass me on to other people who knew Horowitz," Plaskin recounted. "His cousin and only relative in the United States, Natasha Saitzoff, was very belpful, although I'm sure she was asked by the Horowitzes not to cooperate. His onetime traveling companion, Lowell Benedict, got in touch with me or I might not have known he existed."

Gradually a complex picture of Horowitz emerged - one of the greatest performing talents in music history, driven by self-doubt, phobias, sexual conflicts and a troubled marriage. Out of the 58 years since he emigrated from his native Russia, Horowitz did not play the piano in public for 22 years due to ill health, nervous breakdowns and electroshock

Horowitz last played in London in 1982, a benefit for the Royal Opera House, at the invitation of Prince Charles. He has no concert bookings at present, although he commands the highest fee of any classical musician, as much as \$45,000 a concert. "He lives much to himself in New York,

and Wanda spends most of her time in Con-necticut," Plaskin said. "I think they are very lonely people. Everyone has drifted away from him. It's a shame because he can be charming. And as an artist there is something quite demonic and magical about his playing. He thinks like an orchestra. You can almost With "Horowitz, a Biography" behind

him, Plaskin would like to get a job as a reporter with a news magazine. He says be is finished with music as a career and does not want to do another musical biography be-cause "this is the one music biography I have Plaskin said he has sent Horowitz a copy

of the book but there has been no response. The author says he doubts the pianist will ever write his own life story or that anyone will write another hiography.

Patotel Timesharing

"If they do, I wish them luck," he said.

PEOPLE Catcalls for Pavarotti

The Italian tenor Luciano Pa-varotti, making his first appearance at La Scala in Milan in three years, was boosed and whistled in the last to buy a finorescent light fixture but noticed after paying \$7.99 for mermoor. Pavarotti had received the lamp, that four screen sup-rousing applause from a capacity posed to be included were not in audience in the first act, but the fans were furious over what critics him to get them from the handland called a sudden weakening of his department. He picket out four voice in the final aria of the opera.

At the end of the performance, the pocket and walked out to be inangry fans also booed the Swiss rested outside the store by seminary formed esigners Rustin and Ottavio petty largery in a mon jury first Missoni, the masters of Italian Nelson such the store in times. knitted ready-to-wear fashion. The Italian soprano Luciana Serra was the only artist warmly applauded at the opening performance.

husband, Mark Philips, presided over a charity gala for French and British children's organizations Wednesday at the Paris cabaret Le Moulin Rouge. The lavish cabaret show, called "Femmes, Femmes, Femmes," included 61 cancan girls. t all came about, according to a Moulin Rouge spokesman, after Jacki Clerico, the cabaret's owner, went to the Royal Command Per-formance in London with his troupe in November 1981 and Clerico suggested he would like to do something for British and French charities. The French press is calling it a Royal Command Per-formance, which, as a British Emhassy spokesman pointed out, is not strictly correct. To have a royal performance, you have to have the queen," he said, conceding, "If it makes them happy, why not?"... Queen Elizabeth II handed

out 150 honors at Buckingham Pal-ace, including a posthumous gal-lantry award, the Military Cross, that was presented to the widow of a commando killed during the Falklands War, Captain Gavin Hamilton, 29 who survived two helicopter crashes during the 74-Hamilton, 29 who survived two belieopter crashes during the 74 day conflict with Argentina, was killed June 10 while on observation parol. According to his citation, he was wounded in the back but continued firing to allow his signaler to escape and was subsequently killed.

Hamilton, 29 who survived two bury, Engand, in 3 on to serve the coording a macrollight all craft to Harare, Zimbelmes in craft to Harare, Zimbelmes in merity called Salisbury, Refer to make the 11,000 missing the continued firing to allow his signaler to escape and was subsequently killed.
